World Walter Brueggemann, 2025-02-04 Walter Brueggemann has been so effective for so long precisely because he has consistently called upon the church to see beyond the taken for granted realities it confronts by imagining God's alternative reality to recognize that the bars of its entrapment were social constructs and could just as easily be deconstructed so we

could be once again enchanted by God's good news To challenge the taken for granted reality of the church and to imagine an alternative reality Brueggemann consistently takes us back to the biblical text He moves between a description of the reality that appears in front of the church and the alternative that God is preparing for God's people that begins now and moves into God's eschatological future In so doing Brueggemann seeks to unleash the power of God's words to create a new world here and now

Shut Down the Business School Martin Parker, 2018-05-20 Business schools are institutions which a decade after the financial crash continue to act as loudspeakers for neoliberal capitalism with all its injustices and planetary consequences In this lively and incendiary call to action Martin Parker offers a simple message shut down the business school Parker argues that business schools are cash cows for the contemporary university that have produced a generation of unreflective managers primarily interested in their own personal rewards If we see universities as institutions with responsibilities to the societies they inhabit then we must challenge the common notion that the market should be the primary determinant of the education they provide Shut Down the Business School makes a compelling case for a radical alternative in the form of a School for Organising This institution would develop and teach on different forms of organising instead of reproducing the dominant corporate model enabling individuals to discover alternative responses to the pressing issues of inequality and sustainability faced by all of us today

Can the UK Learn to Manage? Ewart Keep,2002

Practically Academic Mitchell J. Larson,2003 This work problematizes business school formation during the 1960s as a stage in the professionalization of British business management In reconstructing the political and economic circumstances surrounding the business schools creation the thesis illustrates various contemporary expectations for the field of management education Throughout the thesis the background formative details and subsequent impact on the economy of the first two British business schools are explored in two ways first the study highlights the paradox between industrial support for management education as such and later unwillingness to hire the graduates of business schools Second it suggests that the formation of business schools may be viewed as a case study of post war Americanization The work emphasizes that business school advocates faced entrenched resistance to academic management programs arising from competing methods of preparation for business careers as well as the academic establishment The thesis demonstrates that the creation of American style management education institutions reflected British desires to elevate the social status of business management practitioners and simultaneously improve business performance
