Introduction

The infinite baffle mounting method effectively utilizes the rear deck and trunk space of most sedan type vehicles. The Comp subwoofer does not require a sealed enclosure for the best performance. Fully install the subwoofer in the baffle. Mark the rear deck or parcel shelf for the hole cut-out diameter of the subwoofer and cut the hole. The rear deck may need to be reinforced to help hold the weight of the subwoofer and to keep it from flexing during playback. Mount 3/4" (1.9 cm) thick MDF (Medium Density Fiberboard) to the bottom of the deck. Mark the MDF and cut the hole. If MDF is not available in your area, use high grade plywood. It is important to isolate the sound coming off the front of the subwoofer from the sound reflecting from the back of the subwoofer. This isolation is usually accomplished by using the driver in a factory speaker location, or in a location with a semi-enclosed rear chamber. (See Figure 1.)

The Comp generates more sound pressure than competing subwoofers on the used in the recommended sealed boxes. These sealed enclosure designs give you increased energy at the lowest frequencies, 30 to 50Hz. These designs do highly accurate bass and can be driven with punishing levels of amplifier power.

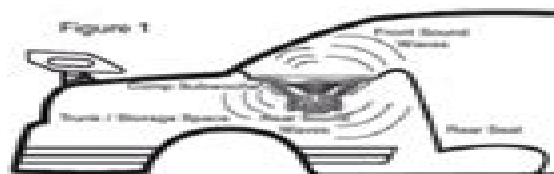

The Comp high-performance suspension system can operate in a larger sealed maximum enclosure volume application is ideal for 50 (ultra sound quality) into enclosure cabinets, a very flat response curve and superbly extends the sub-
