The Creative Turn Anne M. Harris, 2014-04-16 The conundrum of understanding practising and teaching contemporary creativity is that it wants to be all things to all people Almost all modern lists of creativity creative thinking and how to becoming creative books begin with one premise the creative individual artist is not special rather each of us is creative in a special way and these skills can and must be nurtured Increasingly industry and education leaders are claiming that creativity is the core skill to take us into a prosperous future signalling the democratisation of creativity as industry Yet centuries of association between aesthetics mastery and creativity are hard to dismantle These days it is increasingly difficult to discuss creativity without reference to business industry and innovation Why do we love to think of creativity in this way and no longer as that rare visitation of the muse or the elite gift of the few This book looks at the possibility that creativity is taking a turn what that turn might be and how it relates to industry education and ultimately cultural role of creativity and aesthetics for the 21st century In proliferating discourses of the commodification of creativity there is one thing all the experts agree on creativity is undefinable possibly unteachable largely unassessable and becoming the most valuable commodity in 21st century markets

Collaborative Creative Thought and Practice in Music Margaret S. Barrett, 2016-05-23 The notion of the individual creator a product in part of the Western romantic ideal is now troubled by accounts and explanations of creativity as a social construct While in collectivist cultures the assimilation but not the denial of individual authorship into the complexities of group production and benefit has been a feature the notion of the lone individual creator has been persistent Systems theories acknowledge the role of others yet at heart these are still individual views of creativity focusing on the creative individual drawing upon the work of others rather than recognizing the mutually constitutive elements of social interactions across time and space Focusing on the domain of music the approach taken in this book falls into three sections investigations of the people processes products and places of collaborative creativity in compositional thought and practice explorations of the ways in which creative collaboration provides a means of crossing boundaries between disciplines such as music performance and musicology and studies of the emergence of creative thought and practice in educational contexts including that of the composer and the classroom The volume concludes with an extended chapter that reflects on the ways in which the studies reported advance understandings of creative thought and practice The book provides new perspectives to our understandings of the role of collaborative thought and processes in creative work across the domain of music including
