**Growing Old in Early Modern Europe** Erin J. Campbell, 2017-09-29 The goal of the twelve essays in this volume contributed by scholars in the fields of history literature art history and medicine is to enrich our understanding of cultural discourses on ageing in early modern Europe While a number of books examine old age in other eras and a few touch on the early modern period this is the first to focus explicitly on representations of ageing in Europe from 1350 1700 These studies invite the reader to take a closer look at images of ageing they show that representations are embedded in specific communities life situations and structures of power As well the book explores how representations of old age function in various and often surprising ways as repositories of socio cultural anxieties as strategies of self fashioning

and as instruments of ideology capable of disciplining the body and the body politic Since this book is about how old age as a cultural category was produced and maintained through representation the essays in this volume are organised thematically across geographic disciplinary and media boundaries to foreground the politics and poetics of representational strategies The contributors to this collection show that our understanding not only of ageing but also of power subjectivity gender sexuality and the body is enriched by the study of cultural representations of old age Through sensitive and sophisticated readings of a wide range of sources these papers collectively demonstrate the formative influence and generative force of images of old age within early modern European culture *Old Age in the Middle Ages and the Renaissance* Albrecht Classen, 2012-02-14

After an extensive introduction that takes stock of the relevant research literature on Old Age in the Middle Ages and the early modern age the contributors discuss the phenomenon of old age in many different fields of late antique medieval and early modern literature history and art history Both Beowulf and the Hildebrandslied both Wolfram von Eschenbach's Parzival and Titivillus both the figure of Merlin and the trans European tradition of Perceval Peredur Parzival then the figure of the vetula in a variety of medieval French English and Spanish texts and of the Old Man in The Stricker's Daniel both the treatment of old age in Langland's Piers the Plowman and in Jean Gerson's sermons are dealt with Other aspects involve late antique epistolary literature early modern French farce in light of Disability Studies the social role of old impotent men in sixteenth and seventeenth century Netherlandish paintings and the scientific discourse of old age and health since the 1500s The discourse of Old Age proves to have been of central importance throughout the ages so the critical examination of the issues involved sheds intriguing light on the cultural history from late antiquity to the seventeenth century *Growing Old in a Better World* Robert Troschitz, 2024-09-23 As utopias question social ills and express human wants and unfulfilled dreams they offer insights into the problems desires and ideals of a certain time This book uses this lens to examine cultural representations of ageing and old age in utopian writings from the Renaissance till today The individual chapters offer detailed analyses and interpretations of numerous utopias from Thomas More's Utopia 1516 to contemporary science fiction Through close readings the book explores age related fears and ideals and investigates how perceptions of ageing and the life course as well as attitudes towards older people have developed over the centuries Covering a large time span and a broad range of different utopias the book identifies long term developments and also puts certain dreams such as that of everlasting youth into a wider perspective It thus enriches both our understanding of the cultural history of ageing and the history of utopian thought The book will appeal to scholars and students from the fields of cultural gerontology and utopian studies as well as literary studies and cultural history more generally *Growing Old in America* Beth B. Hess, 1980

**Living - Participating - Growing Old** Anton Amann, 2023-01-24 Life must be understood as the result of evolution and human life as the emergence of the species Sapiens from the genus Homo of the family of apes If the emergence of human life as an evolutionary fact is coupled with the notion of social life we are referred to the constructive production of human

life forms of which social participation is an integral part On the one hand participation is tied back to the phylogenesis of the species Sapiens but on the other hand it has to be newly acquired and practiced by every human being in the process of ontogenesis depending on the environment Participation in old age is a separate specification of the conditions of this process and can be illustrated on the basis of a large number of empirical findings This book is a translation of an original German edition The translation was done with the help of artificial intelligence machine translation by the service DeepL com A subsequent human revision was done primarily in terms of content so that the book will read stylistically differently from a conventional translation

**Growing Old in America** David Hackett Fischer, 1978 A history of aging in America surveys and compares actualities and attitudes in the eighteenth nineteenth and twentieth centuries and suggests practical improvements on the current inadequate system of pensions social security medicare and other programs

**Growing Old** Rudolf Steiner, 2019-05-03 And that is one thing we need to relearn that all of life brings its gifts not only the first two or three decades Rudolf Steiner When are we actually old What happens as we age How will we cope with old age Growing old is an art and to grow old in the right way we need spiritual understanding In this enlightening anthology compiled by a director of care homes for the elderly wide ranging cosmological perspectives alternate with detailed observations of the phenomena of ageing Rudolf Steiner sees ageing within the context of the earthly and spiritual evolution that encompasses all forms of existence The book thus begins with the primary meaning that ageing has in developmental terms and ends with a consideration of the human being as co creator in cosmic processes and with our capacity to become increasingly conscious of the tasks this implies These key texts by Rudolf Steiner show how spiritual knowledge can broaden the current debate on the study of old age the process of ageing and the particular problems faced by older people Concerns about our ageing population can be seen in a broader context that recognizes the fruits of old age The productive relationship between childhood and old age a running theme throughout this volume is one example If we grow old consciously viewing ageing not only as a period of physical decline but as a time when we can actively participate in shaping life then we can begin to find greater meaning in it Chapters include The Core Messages of Ageing Fundamental Principles of Gerontology Ageing as a Developmental Process Ageing the Risks and Opportunities The Art of Growing Old Old Age and Death Growing Old A Challenge for Education The Cosmological Dimensions of Ageing

**Middle-aged Women in the Middle Ages** Sue Niebrzydowski, 2011 The phenomenon of medieval women s middle age is a stage in the lifecycle that has been frequently overlooked in preference for the examination of female youth and old age The essays collected here draw variously from literary studies history law art and theology in order to address this lacuna
