focus is communication research Advancing (Im)politeness Studies Chaoqun Xie, 2023-09-26 This volume pushes forward research on im politeness by focusing on interpersonal interaction s cultural digital and emotional aspects With contributions by established and emerging scholars in the field this collection explores and expounds with the combination of solid theoretical foundation and up close empirical demonstration how im politeness not only gives but also gives off communicative and interpersonal meaning in diverse cultural contexts Included are chapters on how im politeness contributes to the construction of social reality online and in social media and how im politeness prompts and is prompted by emotional sensitivities This book is of interest and value to students and researchers in the field and those keen to know how effective human existence and essence are possible through the lens of im politeness Skilled Interpersonal Communication Owen Hargie, 2004-06-01 Previous editions Social Skills in Interpersonal Communication have established this work as the standard textbook on communication Directly relevant to a multiplicity of research areas and professions this thoroughly revised and updated edition has been expanded to include the latest research as well as a new chapter on negotiating Key examples and summaries have been augmented to help contextualise the theory of skilled interpersonal communication in terms of its practical applications Combining both clarity and a deep understanding of the subject matter the authors have succeeded in creating a new edition which will be essential to anyone studying or working in the field of interpersonal communication **Towards an embodied science of intersubjectivity: Widening the scope of social understanding research** Ezequiel Di Paolo, Hanne De Jaegher, 2015-06-16 An important amount of research effort in psychology and neuroscience over the past decades has focused on the problem of social cognition This problem is understood as how we figure out other minds relying only on indirect manifestations of other people s intentional states which are assumed to be hidden private and internal Research on this question has mostly investigated how individual cognitive mechanisms achieve this task A shift in the internalist assumptions regarding intentional states has expanded the research focus with hypotheses that explore the role of interactive phenomena and interpersonal histories and their implications for understanding individual cognitive processes This interactive expansion of the conceptual and methodological toolkit for investigating social cognition we now propose can be followed by an expansion into wider and deeply related research questions beyond but including that of social cognition narrowly construed Our social lives are populated by different kinds of cognitive and affective phenomena that are related to but not exhausted by the question of how we figure out other minds These phenomena include acting and perceiving together verbal and non verbal engagement experiences of dis connection management of relations in a group joint meaning making intimacy trust conflict negotiation asymmetric relations material mediation of social interaction collective action contextual engagement with socio cultural norms structures and roles etc These phenomena are often characterized by a strong participation by the cognitive agent in contrast with the spectatorial stance typical of social cognition research We use the broader notion of embodied

intersubjectivity to refer to this wider set of phenomena This Research Topic aims to investigate relations between these different issues to help lay strong foundations for a science of intersubjectivity the social mind writ large To contribute to this goal we encouraged contributions in psychology neuroscience psychopathology philosophy and cognitive science that address this wider scope of intersubjectivity by extending the range of explanatory factors from purely individual to interactive from observational to participatory
