Krafft, Pasqualina, Perrig-Chiello, Andreas M. Walker, 2018-05-02. This volume addresses the convincing belief that hope is an existential need and resource for living a good life not only when all is going well but especially in difficult times. The findings reported in this volume result from the annual survey of the Hope Barometer Research Program collected during 7 years and conducted in several countries. Structured in three parts, the first one provides the reader with a general introduction into the topic of hope, the theoretical and methodological foundations and major general results of the Hope Barometer. Part two presents specific topics related to the levels and variations of hope across different population groups and the relationship of hope with several measures of well being. Further, part three focuses on comparisons of elements and levels of hope across cultures, discussing methods and techniques to improve hope and thus increase overall well being.

Between Stress and Hope

Rebecca Jacoby, Giora Keinan, 2003-10-30. This volume focuses on the concepts of stress and hope, their psychological and physical outcomes. Past research has focused primarily or exclusively on either stress or hope and its effect on health. This work discusses them side by side and highlights their interrelations. Various theoretical approaches dealing with stress and hope are discussed and a review of the most recent empirical data is presented. Also included are reports on individuals and groups that have been exposed to various stressful situations such as racial prejudice, life threatening illness or imprisonment. The role of hope in coping with these situations is emphasized. Contributors to this edited collection are at the cutting edge of theory and research in the fields of stress and hope. Students and scholars studying health psychology, stress management or stress and coping will appreciate the information presented as will those involved with medical science, nursing and sociology.
