Handbook Of Experimental Existential Psychology:

Handbook of Experimental Existential Psychology Jeff Greenberg, Sander L. Koole, Tom Pyszczynski, 2013-12-17 Social and personality psychologists traditionally have focused their attention on the most basic building blocks of human thought and behavior while existential psychologists pursued broader more abstract questions regarding the nature of existence and the meaning of life This volume bridges this longstanding divide by demonstrating how rigorous experimental methods can be applied to understanding key existential concerns including death uncertainty identity meaning morality isolation determinism and freedom Bringing together leading scholars and investigators the Handbook presents the influential theories and research findings that collectively are helping to define the emerging field of experimental existential psychology

Learner-Centered Pedagogy Kevin Michael Klipfel, Dani Brecher Cook, 2020-03-31 Fusing theory with practice this handbook is a valuable resource to help every practitioner connect with learners more effectively

Born to Wonder Alister McGrath, 2020-08-04 In *Born to Wonder* Alister McGrath a prolific Oxford scholar scientist and theologian explores the deepest mystery at the heart of life itself Life is a gift We never asked to be born Yet here we are living in this strange world of space and time trying to work out what it's all about before the darkness closes in and extinguishes us We are adrift on a misty grey sea of ignorance seeking a sun kissed island of certainty on which we might hope to find clear answers to our deepest and most poignant questions What is the point of life Why are we here And what is it about us that makes us want to ask these questions As far as we know we're the only species on earth that asks these questions and dares to hope that we might find an answer It seems that we are born to wonder not merely to exist From time to time all of us find ourselves overwhelmed by a sense of awe or mystery often when confronted with the beauty of nature whether it is a mountain stream or the vast expanse of ocean waters That is when we see a flicker of a grander vision of reality perhaps lying beyond the horizons of our experience It is as if for only a moment a veil is removed and we catch a half glimpsed sight of a promised land waiting to be mapped and explored This sense of wonder fuels much of humanity's creativity and its search for understanding

The Great Mystery Alister E McGrath, 2017-05-04 There is currently huge interest in the question of human nature and identity and what the human future might look like Who are we Why are we here What is our future Are we alone And what can religion bring alongside biology and anthropology to these important and exciting questions The Great Mystery focuses on this fascinating field of study Alister McGrath bestselling author and Andreas Idreos Professor of Science and Religion at Oxford University explores the question of human nature from both scientific and religious perspectives and weaves together the results to open up and explore some of the deepest and most important questions about who we are why we matter and what our future might be A follow up to his critically acclaimed *Inventing the Universe* in *The Great Mystery* Alister McGrath once again brings together science with religion to yield an enriched vision of reality along with rigorous and thoroughly up to date scholarship and intellectual accessibility

Media Choice Tilo Hartmann, 2009-06-11 This volume represents the next generation of research in media psychology bridging selective exposure into a larger framework of choice in media usage Considering the myriad media options available to use this work seeks to answer such questions as What mechanisms guide an individual's exposure to choice of media How can researchers model them The questions why and how people decide to use media offerings are key in current communication scholarship Research on selective exposure has addressed this area in the past but the term media choice is used here to represent any implicit automatic spontaneous or explicit deliberate decisions of the users and subsequent behavioral consequences that lead to a contact with a media stimulus
