ICT Innovations 2013 Vladimir Trajkovik, Anastas Mishev, 2013-07-20 Information communication technologies have become the necessity in everyday life enabling increased level of communication processing and information exchange to extent that one could not imagine only a decade ago Innovations in these technologies open new fields in areas such as language processing biology medicine robotics security urban planning networking governance and many others The applications of these innovations are used to define services that not only ease but also increase the quality of life Good education is essential for establishing solid basis of individual development and performance ICT is integrated part of education at every level and type Therefore the special focus should be given to possible deployment of the novel technologies in order to achieve educational paradigms adapted to possible educational consumer specific and individual needs This book offers a collection of papers presented at the Fifth International Conference on ICT Innovations held in September 2013 in Ohrid Macedonia The conference gathered academics professionals and practitioners in developing solutions and systems in the industrial and business arena especially innovative commercial implementations novel applications of technology and experience in applying recent ICT research advances to practical solutions **Advances in Intelligent Systems Research and Innovation** Vassil Sgurev, Vladimir Jotsov, Janusz Kacprzyk, 2021-11-03 This book represents the experience of successful researchers from four continents on a broad range of intelligent systems and it hints how to avoid anticipated conflicts and problems during multidisciplinary innovative research from Industry 4.0 and or Internet of Things through modern machine learning and software agent applications to open data science big data advance analytics visual analytics text mining web mining knowledge discovery deep data mining issues The considered intelligent part is essential in most smart control systems cyber security bioinformatics virtual reality robotics mathematical modelling projects and its significance rapidly increases in other technologies Theoretical foundations of fuzzy sets mathematical and non classical logic also are rapidly developing **Green IT Engineering: Social, Business and Industrial Applications** Vyacheslav Kharchenko, Yuriy Kondratenko, Janusz Kacprzyk, 2018-09-29 This book describes the implementation of green IT in various human and industrial domains Consisting of four sections Development and Optimization of Green IT Modelling and Experiments with Green IT Systems Industry and Transport Green IT Systems Social Educational and Business Aspects of Green IT it presents results in two areas the green components networks cloud and IoT systems and infrastructures and the industry business social and education domains It discusses hot topics such as programmable embedded and mobile systems sustainable software and data centers Internet servicing and cyber social computing assurance cases and lightweight cryptography in context of green IT Intended for university students lecturers and researchers who are interested in power saving and sustainable computing the book also appeals to engineers and managers of companies that develop and implement energy efficient IT applications **Handbook of Research on Innovations in Technology and**

Marketing for the Connected Consumer Dadwal, Sumesh Singh, 2019-11-15 Connected customers using a wide range of devices such as smart phones tablets and laptops have ushered in a new era of consumerism Now more than ever this change has prodded marketing departments to work with their various IT departments and technologists to expand consumers access to content In order to remain competitive marketers must integrate marketing campaigns across these different devices and become proficient in using technology The Handbook of Research on Innovations in Technology and Marketing for the Connected Consumer is a pivotal reference source that develops new insights into applications of technology in marketing and explores effective ways to reach consumers through a wide range of devices While highlighting topics such as cognitive computing artificial intelligence and virtual reality this publication explores practices of technology empowered digital marketing as well as the methods of applying practices to less developed countries This book is ideally designed for marketers managers advertisers branding teams application developers IT specialists academicians researchers and students

Handbook of Research on Cultural Heritage and Its Impact on Territory Innovation and Development Oliveira, Lília, Amaro, Ana Carla, Melro, Ana, 2020-11-13 Cultural heritage is perceived as the glue that keeps individuals together and makes them feel a part of something larger It is the past that allows individuals to understand their present and move towards the future In networked society it is impossible to think about cultural heritage and its preservation and maintenance without including the digital processes and ICT systems as well as its impact on territorial innovation The Handbook of Research on Cultural Heritage and Its Impact on Territory Innovation and Development is a critical and comprehensive reference book that analyzes how preservation and sustainability of cultural heritage occurs in countries as well as how it contributes to territorial innovation Moreover the book examines how technological tools contribute to its preservation and sustainability as well as its dissemination Highlighting topics that include public policies spatial development and architectural heritage this book is ideal for cultural heritage professionals government officials policymakers academicians researchers and students

Advances in Artificial Systems for Medicine and Education II Zhengbing Hu, Sergey V. Petoukhov, Matthew He, 2019-05-16 This book includes the proceedings of the Second International Conference of Artificial Intelligence Medical Engineering Education AIMEE2018 held in Moscow Russia on 6 8 October 2018 The conference covered advances in the development of artificial intelligence systems and their applications in various fields from medicine and technology to education The papers presented in the book discuss topics in mathematics and biomathematics medical approaches and technological and educational approaches Given the rapid development of artificial intelligence systems the book highlights the need for more intensive training for a growing number of specialists particularly in medical engineering to increase the effectiveness of medical diagnosis and treatment The book is intended for specialists students and other readers who would like to know where artificial intelligence systems can beneficially be applied in the future

New Perspectives on Information Systems Modeling and Design Rosado da Cruz, António Miguel, Ferreira da

Cruz, Maria Estrela, 2018-11-09 Information modeling plays an important role in every level of the enterprise information system s architecture Modeling allows organizations to adapt and become more efficient helping top managers and engineers outline tactics to reach strategic objectives understand organizational needs and design information systems that are aligned with business goals New Perspectives on Information Systems Modeling and Design is an essential reference source that discusses organizational adaptation through the integration of new information technologies into existing processes and underlying supporting applications Featuring research on topics such as application integration change management and mobile process activities this book is ideally designed for managers researchers system developers entrepreneurs graduate level students business professionals information system engineers and academicians seeking coverage on emerging technological developments and practical solutions for system modeling and design

The Routledge Handbook of Hotel Chain Management Maya Ivanova, Stanislav Ivanov, Vincent P. Magnini, 2016-05-05 Understanding the global hotel business is not possible without paying specific attention to hotel chain management and dynamics Chains are big business approximately 80 percent of hotels currently being constructed around the world are chain affiliated and in 2014 the five largest brands held over a one million rooms The high economic importance of the hotel chains and their global presence justifies the academic research in the field however despite this there is no uniform coverage in the current body of literature This Handbook aids in filling the gap by exploring and critically evaluates the debates issues and controversies of all aspects of hotel chains from their nature fundamentals of existence and operation expansion strategic and operational aspects of their activities and geographical presence It brings together leading specialists from range of disciplinary backgrounds and regions to provide state of the art theoretical reflection and empirical research on current issues and future debates Each of the five inter related section explores and evaluates issues that are of extreme importance to hotel chain management focusing on theoretical issues the expansion of hotel chains strategic and operational issues the view point of the individual affiliated hotel and finally the current and future debates in the theory and practice of hotel chain management arising from globalisation demographic trends sustainability and new technology development It provides an invaluable resource for all those with an interest in hotel management hospitality tourism and business encouraging dialogue across disciplinary boundaries and areas of study This is essential reading for students researchers and academics of Hospitality as well as those of Tourism Marketing Business and Events Management

Games and Play in the Creative, Smart and Ecological City Dale Leorke, Marcus Owens, 2020-12-30 This book explores what games and play can tell us about contemporary processes of urbanization and examines how the dynamics of gaming can help us understand the interurban competition that underpins the entrepreneurialism of the smart and creative city Games and Play in the Creative Smart and Ecological City is a collection of chapters written by an interdisciplinary group of scholars from game studies media studies play studies architecture landscape architecture and urban planning It situates the historical evolution of play and games in the urban

landscape and outlines the scope of the various ways games and play contribute to the city's economy, cultural life and environmental concerns. In connecting games and play more concretely to urban discourses and design strategies, this book urges scholars to consider their growing contribution to three overarching sets of discourses that dominate urban planning and policy today: the creative and cultural economies of cities, the smart and playable city, and ecological cities. This interdisciplinary work will be of great interest to students and scholars of game studies, play studies, landscape architecture and allied design fields, urban geography and art history. Smart Sustainable Cities of the Future Simon Elias Bibri, 2018-02-24. This book is intended to help explore the field of smart sustainable cities in its complexity, heterogeneity and breadth, the many faces of a topical subject of major importance for the future that encompasses so much of modern urban life in an increasingly computerized and urbanized world. Indeed, sustainable urban development is currently at the center of debate in light of several ICT visions becoming achievable and deployable computing paradigms and shaping the way cities will evolve in the future and thus tackle complex challenges. This book integrates computer science, data science, complexity science, sustainability science, system thinking and urban planning and design. As such, it contains innovative computer-based and data analytic research on smart sustainable cities as complex and dynamic systems. It provides applied theoretical contributions fostering a better understanding of such systems and the synergistic relationships between the underlying physical and informational landscapes. It offers contributions pertaining to the ongoing development of computer-based and data science technologies for the processing, analysis, management, modeling and simulation of big and context data and the associated applicability to urban systems that will advance different aspects of sustainability. This book seeks to explicitly bring together the smart city and sustainable city endeavors and to focus on big data analytics and context-aware computing specifically. In doing so, it amalgamates the design concepts and planning principles of sustainable urban forms with the novel applications of ICT of ubiquitous computing to primarily advance sustainability. Its strength lies in combining big data and context-aware technologies and their novel applications for the sheer purpose of harnessing and leveraging the disruptive and synergetic effects of ICT on forms of city planning that are required for future forms of sustainable development. This is because the effects of such technologies reinforce one another as to their efforts for transforming urban life in a sustainable way by integrating data-centric and context-aware solutions for enhancing urban systems and facilitating coordination among urban domains. This timely and comprehensive book is aimed at a wide audience across science, academia, industry and policymaking. It provides the necessary material to inform relevant research communities of the state-of-the-art research and the latest development in the area of smart sustainable urban development as well as a valuable reference for planners, designers, strategists and ICT experts who are working towards the development and implementation of smart sustainable

cities based on big data analytics and context aware computing Artificial Intelligence for Smart Healthcare Parul Agarwal,Kavita Khanna,Ahmed A Elngar,Ahmed J. Street,2021-04-22 Planning today is an increasingly complex system of specialisms and this brand new introduction is the first textbook to offer both a broad overview of each core area in planning alongside the skills necessary to combine each specialism in order to make sustainable and efficient planning decisions In so doing it gives students a unique glimpse into the realities of working in planning today Planners need knowledge that goes beyond the history of planning decisions in order to reconcile competing demands from corporate speculative property developers to environmental activists This new role aggregating specialisms is at the forefront of this innovative approach equipping students with the tools necessary to do planning which today means being both expert and generalist specialist and synthesiser Planners must now act as professional mediators of different often conflicting or incompatible interests Planners are themselves working as specialists whether that is in heritage transport ecology economic assessment or design And this dual role reflects the organisation of this new text introduced with a wealth of practitioner informed chapters to enliven and inspire passion for the crucial role of

planning This text is an ideal companion for all practitioners and students of planning and related disciplines at undergraduate and master s level **Intelligent Computing and Innovation on Data Science** Sheng-Lung Peng,Le Hoang Son,G. Suseendran,D. Balaganesh,2020-05-14 This book covers both basic and high level concepts relating to the intelligent computing paradigm and data sciences in the context of distributed computing big data data sciences high performance computing and Internet of Things It is becoming increasingly important to develop adaptive intelligent computing centric energy aware secure and privacy aware systems in high performance computing and IoT applications In this context the book serves as a useful guide for industry practitioners and also offers beginners a comprehensive introduction to basic and advanced areas of intelligent computing Further it provides a platform for researchers engineers academics and industrial professionals around the globe to showcase their recent research concerning recent trends Presenting novel ideas and stimulating interesting discussions the book appeals to researchers and practitioners working in the field of information technology and computer science **Handbook of Globalisation and Tourism** Dallen J. Timothy,2019-12-27 Globalization entails the world becoming a smaller place through political socio cultural and economic processes These processes have salient implications for tourism and tourism itself is one of the driving forces behind globalization This book is a collection of conceptual treatises by international scholars about the dynamics and reach of globalization and its relationships with tourism It anatomizes and deconstructs the global forces processes and challenges that face the world of tourism It is international in scope encyclopedic in its conceptual depth empirically evocative and contemporary in its coverage **Social and Occupational Ergonomics** Waldemar Karwowski, Henrijs Kalkis and Zenija Roja,2022-07-24 Social and Occupational Ergonomics Proceedings of the 13th International Conference on Applied Human Factors and Ergonomics AHFE 2022 July 24 28 2022 New York USA **Tax Cooperation in an Unjust World** Allison Christians,Laurens van Apeldoorn,2021 A demonstration of the role that tax systems play in achieving international justice this book establishes that current international tax systems facilitate wealthy states claiming an unfair share of the global economy shows how this system feeds off human suffering and explains how to achieve justice using existing international structures **Handbook of Best Practices in Sustainable Development at University Level** Walter Leal Filho,Claudio Ruy Portela de Vasconcelos,2022-07-05 This book gives a special emphasis to state of the art descriptions of approaches methods initiatives and projects from universities stakeholders organizations and civil society across the world regarding cross cutting issues in sustainable development There is a perceived need for mobilizing the various stakeholders when attempting to promote sustainability in higher education and to promote best practices which may inspire further initiatives But despite this need there are a few publications handling this matter in a coherent way In order to meet the pressing need for publications which may document and disseminate examples of best practice on sustainable development at university level the Handbook of Best Practices in Sustainable Development at University Level is being published This book is produced by the European School of

Sustainability Science and Research ESSSR through the Inter University Sustainable Development Research Programme IUSDRP and contains inputs from authors across all geographical regions The book also discusses examples of initiatives coordinated by universities but involving civil society the private sector and public sector including local national and intergovernmental bodies In particular it describes practical experiences partnerships networks and training schemes for building capacity aimed at fostering the cause of sustainable development at institutions of higher education Thanks to its design and the contributions by experts from various areas it provides a welcome contribution to the literature on sustainable development and it may inspire further works in this field

From an Ethic of Sufficiency to its Policy and Practice in Late Capitalism Manu V. Mathai, Sylvia Lorek, Wolfgang Sachs, 2023-12-13 That the notion of sufficiency is essential for a good life is an idea that enjoys support across many ethical philosophical religious and cultural persuasions This notion reasserted itself in the study of sustainability once modern society reluctantly took cognizance of the limited low entropy energy and matter available for human appropriation There is today therefore a general recognition of i e not necessarily wide agreement on the merits of or needs for notions of sufficiency as a species of environmentalism within secular communities In this context a critical question that invites our attention is how to effect sufficiency and in particular of dealing with the daunting challenge of injustice as well as questions of distribution within and between countries that it brings to attention Given sufficiency's original home as it were in tradition the modern world has tended to dismiss it or to plead to individual voluntary simplicity when faced with evidence asserting its necessity Sufficiency is also often written away as a spiritual problem The domain of ascetics and the religious How to habilitate sufficiency in a political economy for the secular modern facing its biggest existential challenge yet in the form of the environmental crisis
