Idea-Based Learning Edmund J. Hansen, 2023-07-03 Synthesizing the best current thinking about learning course design and promoting student achievement this is a guide to developing college instruction that has clear purpose is well integrated into the curriculum and improves student learning in predictable and measurable ways The process involves developing a transparent course blueprint focused on a limited number of key concepts and ideas related tasks and corresponding performance criteria as well as on frequent practice opportunities and early identification of potential learning barriers Idea based Learning takes as its point of departure the big conceptual ideas of a discipline that give structure and unity to a course and even to the curriculum as opposed to a focus on content that can lead to teaching sequences of loosely related topics and aligns with notions of student centered and outcomes based learning environments Adopting a backwards design model it begins with three parallel processes first identifying the material that is crucial for conceptual understanding second articulating a clear rationale for how to choose learning outcomes based on student needs and intellectual readiness and finally aligning the learning outcomes with the instructional requirements of the authentic performance tasks The resulting syllabi ensure cohesion between sections of the same course as well as between courses within a whole curriculum assuring the progressive development of students skills and knowledge Key elements of IBL include Helping students see the big picture Building courses around one or more authentic performance tasks that illuminate the core concepts of the discipline Clearly identifying performance criteria for all tasks Incorporating practice in the competencies that are deemed important for students success By placing the onus of learning on the student liberating faculty to take on the role of learning coaches Designing tasks that help students unlearn simplistic ideas and replace them with improved understandings Edmund Hansen expertly guides the reader through the steps of the process providing examples along the way and concluding with a sample course design document and syllabus that illustrate the principles he propounds

**Idea-based Learning** Edmund Hansen, 2023 Synthesizing the best current thinking about learning course design and promoting student achievement this is a guide to developing college instruction that has clear purpose is well integrated into the curriculum and improves student learning in predictable and measurable ways The process involves developing a transparent course blueprint focused on a limited number of key concepts and ideas related tasks and corresponding performance criteria as well as on frequent practice opportunities and early identification of potential learning barriers Idea based Learning takes as its point of departure the big conceptual ideas of a discipline that give structure and unity to a course and even to the curriculum as opposed to a focus on content that can lead to teaching sequences of loosely related topics and aligns with notions of student centered and outcomes based learning environments Adopting a backwards design model it begins with three parallel processes first identifying the material that is crucial for conceptual understanding second articulating a clear rationale for how to choose learning outcomes based on student needs and intellectual readiness and finally aligning the learning

outcomes with the instructional requirements of the authentic performance tasks The resulting syllabi ensure cohesion between sections of the same course as well as between courses within a whole curriculum assuring the progressive development of students skills and knowledge Key elements of IBL include Helping students see the big picture Building courses around one or more authentic performance tasks that illuminate the core concepts of the discipline Clearly identifying performance criteria for all tasks Incorporating practice in the competencies that are deemed important for students success By placing the onus of learning on the student liberating faculty to take on the role of learning coaches Designing tasks that help students unlearn simplistic ideas and replace them with improved understandings Edmund Hansen expertly guides the reader through the steps of the process providing examples along the way and concluding with a sample course design document and syllabus that illustrate the principles he propounds

**Models of Social Intervention** Derling Jose Mendoza Velazco, Iris María Sánchez Azua, Yuliana Betzabé Vélez Ozaeta, Luis Efrén Rúa Sánchez, Josselyn Leonela Muñoz Briones, 2024-10-19 This book addresses several fundamental aspects of social work practice From a qualitative and exploratory perspective the book analyses pre professional practices in the formation of social workers by contrasting the perspectives of students institutional supervisors and university lecturers Areas of opportunity in training are identified such as handling personal and family crises of high conflict the lack of specialised knowledge according to intervention areas and limited participation in technical processes The book proposes strengthening communication mediation and emotional support skills as well as incorporating optional courses and specific diplomas to fill these gaps Methodologically the book is based on semi structured interviews and focus groups allowing a systemic understanding of the educational phenomenon from the voice of the main actors Together this work offers an enriching overview of the challenges and opportunities in the practical training of social workers laying the foundations for improving the quality of these training processes

**Specifications Grading** Linda B. Nilson, 2023-07-03 In her latest book Linda Nilson puts forward an innovative but practical and tested approach to grading that can demonstrably raise academic standards motivate students tie their achievement of learning outcomes to their course grades save faculty time and stress and provide the reliable gauge of student learning that the public and employers are looking for She argues that the grading system most commonly in use now is unwieldy imprecise and unnecessarily complex involving too many rating levels for too many individual assignments and tests and based on a hairsplitting point structure that obscures the underlying criteria and encourages students to challenge their grades This new specifications grading paradigm restructures assessments to streamline the grading process and greatly reduce grading time empower students to choose the level of attainment they want to achieve reduce antagonism between the evaluator and the evaluated and increase student receptivity to meaningful feedback thus facilitating the learning process all while upholding rigor In addition specs grading increases students motivation to do well by making expectations clear lowering their stress and giving them agency in determining their course goals Among the unique characteristics of the schema all of which simplify faculty decision making are the elimination of partial credit the reliance on a one level grading rubric and the bundling of assignments and tests around learning outcomes Successfully completing more challenging bundles or modules earns a student a higher course grade Specs grading works equally well in small and large class settings and encourages authentic assessment Used consistently over time it can restore credibility to grades by demonstrating and making transparent to all stakeholders the learning outcomes that students achieve This book features many examples of courses that faculty have adapted to spec grading and lays out the surprisingly simple transition process It is intended for all members of higher education who teach whatever the discipline and regardless of rank as well as those who oversee train and advise those who teach Specification grading promotes the following values and outcomes It 1 Upholds High Academic Standards 2 Reflects Student Attainment of Skills and Knowledge 3 Motivates Students to Learn and to Excel 4 Fosters Higher Order Cognitive Development and Creativity 5 Discourages Cheating 6 Reduces Student Stress 7 Makes Students Feel Responsible for Their Grades 8 Minimizes Conflict Between Faculty and Students 9 Saves Faculty Time and Is Simple to Administer 10 Makes Expectations Clear and Simplifies Feedback for Improvement 11 Assesses Authentically 12 Achieves High Inter Rater Agreement

Student Attainment in Higher Education Graham Steventon, Debra Cureton, Lynn Clouder, 2016-02-05 Student Attainment in Higher Education Issues controversies and debates is a timely exploration of student attainment in a rapidly changing higher education context and a rapidly changing world The effects of neoliberalism and the commercialization of everyday life on

education have been well documented but with a focus on pedagogy whilst student success is measured through grades statistics and metrics By exploring attainment in a broader context this book provides a unique contribution to the critical literature on contemporary higher education Within the themes of understanding attainment and challenging practice the book sets out to explore student attainment as complex and multifaceted It achieves this by looking at different conceptualizations of what attainment means and to whom how attainment is shaped by different and often competing agendas and vested interests The book highlights these wider issues controversies and debates that underpin student attainment whilst at the same time engaging with strategic and local interventions which set out to improve aspects of the higher education system and increase individual and social agency within it Sharing a range of pedagogical approaches and interventions some of the key topics include addressing attainment gaps engaging mature learners nurturing the intellectual identity the impact of activity choices Creating a dialogue amongst different audiences about national and international controversies and debates around the topic of student attainment this contribution will be beneficial to teaching professionals policymakers and strategists As an edited collection with contextualisation in the wider research arena the book has both national and international applicability and transferability

*Reconceptualizing Faculty Development in Service-Learning/Community Engagement* Becca Berkey, Emily Eddins Rountree, Patrick M. Green, Cara Meixner, 2023-07-03

The role of educational developer in the realm of service learning and community engagement S LCE is multidimensional Given the potentially transformational nature for both faculty and students of the experiences and courses in whose design they may be directly or indirectly involved as well as their responsibility to the communities served by these initiatives they have to be particularly attentive to issues of identity values and roles As both practitioners and facilitators they are often positioned as third space professionals This edited volume provides educational developers and community engagement professionals an analysis of approaches to faculty development around service learning and community engagement Using an openly self reflective approach the contributors to this volume offer an array of examples and models as well as realistic strategies to empower readers to evolve their faculty development efforts in service learning and community engagement on their respective campuses It is also a call for recognition that the practice of S LCE needs to be institutionalized and improved The book further addresses the field s potential contributions to scholarship such as the scholarship of teaching and learning SoTL publicly engaged scholarship and collaborative inquiry among others The case studies provide an outline of program models and promising practices including an authentic analysis of the institutional context within which they operate the positionality of the practitioner scholars overseeing them the resources required and the evidence related to both successes and challenges of these approaches The contributed chapters are organized under four themes the landscape of faculty development and community engagement models of faculty development in S LCE challenges and opportunities in pedagogy and partnerships and engendering change in educational development
