**Subversive Archaism** Michael Herzfeld, 2021-10-11 In Subversive Archaism Michael Herzfeld explores how individuals and communities living at the margins of the modern nation state use nationalist discourses of tradition to challenge state authority under both democratic and authoritarian governments Through close attention to the claims and experiences of mountain shepherds in Greece and urban slum dwellers in Thailand Herzfeld shows how these subversive archaists draw on national histories and past polities to claim legitimacy for their defiance of bureaucratic authority Although vilified by government authorities as remote primitive or dangerous often as preemptive justification for violent repression these groups are not revolutionaries and do not reject national identity but they do question the equation of state and nation Herzfeld explores the political strengths and vulnerabilities of their deployment of heritage and the weaknesses they expose in the bureaucratic and ethnonational state in an era of accelerated globalization

Facing Gaia Bruno Latour, 2017-07-24 The emergence of modern sciences in the seventeenth century profoundly renewed our understanding of nature For the last three centuries new ideas of nature have been continually developed by theology politics economics and science especially the sciences of the material world The situation is even more unstable today now that we have entered an ecological mutation of unprecedented scale Some call it the Anthropocene but it is best described as a new climatic regime And a new regime it certainly is since the many unexpected connections between human activity and the natural world oblige every one of us to reopen the earlier notions of nature and redistribute what had been packed inside So the question now arises what will replace the old ways of looking at nature This book explores a potential candidate proposed by James Lovelock when he chose the name Gaia for the fragile complex system through which living phenomena modify the Earth The fact that he was immediately misunderstood proves simply that his readers have tried to fit this new notion into an older frame transforming Gaia into a single organism a kind of giant thermostat some sort of New Age goddess or even divine Providence In this series of lectures on natural religion Bruno Latour argues that the complex and ambiguous figure of Gaia offers on the contrary an ideal way to disentangle the ethical political theological and scientific aspects of the now obsolete notion of nature He lays the groundwork for a future collaboration among scientists theologians activists and artists as they and we begin to adjust to the new climatic regime
