[Communication in Non-Human Animals](#) Ulrike Griebel, D. Kimbrough Oller, Irene M. Pepperberg, 2024-06-13 Human language is unique among animals We assume that complex cognitive capacities in general and language in particular evolved gradually and thus are manifest in different kinds and or degrees in other animals demonstrating social communication This assumption is supported by the fact that we can train social species from very different groups of animals e.g. great apes dolphins dogs parrots to understand and in several cases even use abstract symbols for communication with humans and conspecifics Even simple grammatical rules for sequences of 2-3 symbols can be trained to be understood by several species e.g. great apes dogs dolphins Even though human language training in these species takes considerable time and effort it convinces us that cognitive foundations for language are present in other species and given the relevant selection pressures symbolic communication could evolve in other species **The Greatest Inventions of the**

Ferguson, 2017-03-02 Christine Ferguson's timely study is the first comprehensive examination of the importance of language in forming a crucial nexus among popular fiction biology and philology at the Victorian fin de siècle Focusing on a variety of literary and non-literary texts the book maps out the dialogue between the Victorian life and social sciences most involved in the study of language and the literary genre frequently indicted for causing linguistic corruption and debasement popular

fiction Ferguson demonstrates how Darwinian biological philological and anthropological accounts of primitive and animal language were co-opted into wider cultural debates about the apparent brutality of popular fiction and shows how popular novelists such as Marie Corelli Grant Allen H G Wells H Rider Haggard and Bram Stoker used their fantastic narratives to radically reformulate the relationships among language thought and progress that underwrote much of the contemporary prejudice against mass literary taste In its alignment of scientific cultural and popular discourses of human language Language Science and Popular Fiction in the Victorian Fin de Si cle stands as a corrective to assessments of best selling fiction s intellectual ideological and aesthetic simplicity

Animals and Ethics - Third Edition Angus Taylor,2009-05-27 Can animals be regarded as part of the moral community To what extent if at all do they have moral rights Are we wrong to eat them hunt them or use them for scientific research Can animal liberation be squared with the environmental movement Taylor traces the background of these debates from Aristotle to Darwin and sets out the views of numerous contemporary philosophers including Peter Singer Tom Regan Mary Anne Warren J Baird Callicott and Martha Nussbaum with ethical theories ranging from utilitarianism to eco feminism The new edition also includes provocative quotations from some of the major writers in the field As the final chapter insists animal ethics is more than just an academic question it is intimately connected both to our understanding of what it means to be human and to pressing current issues such as food shortages environmental degradation and climate change

The Tiger John Vaillant,2010-08-24 It s December 1997 and a man eating tiger is on the prowl outside a remote village in Russia s Far East The tiger isn t just killing people it s annihilating them and a team of men and their dogs must hunt it on foot through the forest in the brutal cold To their horrified astonishment it emerges that the attacks are not random the tiger is engaged in a vendetta Injured and starving it must be found before it strikes again and the story becomes a battle for survival between the two main

characters Yuri Trush the lead tracker and the tiger itself As John Vaillant vividly recreates the extraordinary events of that winter he also gives us an unforgettable portrait of a spectacularly beautiful region where plants and animals exist that are found nowhere else on earth and where the once great Siberian Tiger the largest of its species which can weigh over 600 lbs at more than 10 feet long ranges daily over vast territories of forest and mountain its numbers diminished to a fraction of what they once were We meet the native tribes who for centuries have worshipped and lived alongside tigers even sharing their kills with them in a natural balance We witness the first arrival of settlers soldiers and hunters in the tiger s territory in the 19th century and 20th century many fleeing Stalinism And we come to know the Russians of today such as the poacher Vladimir Markov who crushed by poverty have turned to poaching for the corrupt high paying Chinese markets Throughout we encounter surprising theories of how humans and tigers may have evolved to coexist how we may have developed as scavengers rather than hunters and how early Homo sapiens may have once fit seamlessly into the tiger s ecosystem Above all we come to understand the endangered Siberian tiger a highly intelligent super predator and the grave threat it faces as logging and poaching reduce its habitat and numbers and force it to turn at bay Beautifully written and deeply informative The Tiger is a gripping tale of man and nature in collision that leads inexorably to a final showdown in a clearing deep in the Siberian forest
