## **Igbc Green Homes Abridged Reference Guide:**

Green Building Guidance Karthik Karuppu, NVICO, 2019-02-07 Conventional buildings don't have sustainability because of the approach of designing and the construction method. The total energy consumption calculated for all buildings accounts for up to 40% in India and commercial and residential real estate combined will account for more than 2000 TWH of energy consumption by 2030. India has an expected energy deficit of around 12% which is one of the major hurdles for the government. This will result in a further increase in electrification in all areas. Green buildings utilize fewer resources and are healthier to live in. They offer significant operational cost savings compared with conventional buildings. In effect, green homes can expect a 14 percent savings in operational costs over five years for new green buildings and 13 percent savings in operational costs over five years for green retrofit and renovation projects. Building owners also report that green buildings, whether new or renovated, give a 7 percent increase in asset value over conventional buildings. **IGBC Green Homes**, 2009

**Smart Energy Practices for a Sustainable World** Nina S. Godbole, John P. Lamb, 2023-06-13 Mankind has scaled unprecedented growth since the advent of the Industrial Revolution. However, this progress has come at the hefty cost of environmental degradation. Climate change undeniably is one of the biggest challenges of the planet Earth and is largely anthropogenic. In the modern world context, the phenomenon of climate change is one of the most defining issues when it comes to realizing objectives of the Sustainable Development Goals (SDGs). Climate change is not limited to geographical boundaries; it is a global problem hence requires global solutions. It has been widely discussed and therefore has acquired centre stage across the major world forums. **Smart Energy Practices for a Sustainable World** how we all can contribute stresses the need for us to judiciously sustainably and smartly harness and use energy techniques in order to effectively combat climate change. The book also gives an in-depth discussion on utilization of artificial intelligence and information technology to realize energy efficiency in various sectors of economy including but not limited to transportation, buildings, infrastructure, health care and other services. Text is supplemented by case studies that depict ground level reality to facilitate comprehension of the subject matter. The appendices serve as an extended learning of the concepts discussed in the chapters. The publication would serve as a valuable reference for both scholars and researchers engaged in the domain in addition to being a guide to industry as well as the academic world.

**Sustainable Building Design** Chitrarekha Kabre, 2017-10-10 This book bridges the gap between research

and practice in the area of sustainable design of buildings exploring the passive climate responsive design and thermal behavior of buildings and ways to incorporate these enhancements in architectural and civil engineering practice It presents climatic data and its analysis in a readily usable form and shows ways in which such data can be used to achieve passive climate responsive and sustainable building design The book presents case studies of sustainable building in each of five climatic zones of India The book includes climatic data from 62 cities in India and describes how it can be synthesized in sustainable building design The book can serve as a practical tool or handbook for architects engineers and designers providing them with an understanding of the physical phenomena involved and a means for suitably implementing and applying passive climate responsive design principles It also offers a valuable resource for researchers students and policymakers working in the area of sustainable building design and construction

Strategic Management, Decision Theory, and Decision Science Bikas Kumar Sinha, Sriji Bhusan Bagchi, 2021-08-31 This book contains international perspectives that unifies the themes of strategic management decision theory and data science It contains thought provoking presentations of case studies backed by adequate analysis adding significance to the discussions Most of the decision making models in use do take due advantage of collection and processing of relevant data using appropriate analytics oriented to provide inputs into effective decision making The book showcases applications in diverse fields including banking and insurance portfolio management inventory analysis performance assessment of comparable economic agents managing utilities in a health care facility reducing traffic snarls on highways monitoring achievement of some of the sustainable development goals in a country or state and similar other areas that showcase policy implications It holds immense value for researchers as well as professionals responsible for organizational decisions

**Rainwater Harvesting** Anil Lalwani, 2022-09-09 Our dependency on groundwater resources and overuse thereof has led to a decline in water table so that in the last couple of decades the focus has shifted back to the traditional practices of rainwater harvesting and ways and means have been sought to promote Rainwater harvesting in Urban areas to recharge the stressed groundwater systems This book discusses in brief the classifications of Rainwater harvesting and the various rainwater harvesting systems that are currently applied The most important aspect for achieving any groundwater recharge is the availability of source water this can be evaluated by analyzing the monsoon rainfall pattern its frequency number of rainy days and maximum rainfall in a day and its variation in space and time The Deccan basalts are one of the most enigmatic rocks in India and pose a very difficult task when it comes to ground water exploration and groundwater recharge especially in the urban areas where due to constraint of space one needs to resort to borewells for recharge purpose It is important for any such undertaking to understand the applicability and sustainability aspects of Rainwater harvesting as it is being practiced This book tries to differentiate the Basaltic Aquifers from the other hard rock Aquifers and highlights the difficulties in trying to implement rainwater harvesting by groundwater recharge with the basaltic terrain It also deals with the issue of long term sustainability

of roof top Rainwater to meet the growing demands of fresh water It also highlights some of the shortcomings in the methodologies used and the requirements for being considered in the various categories of green building rating agencies It furthermore clarifies the possibility and limitations of dependence of roof top harvesting in addressing the question of water shortages which is of common occurrence within most urban centres of India It also helps in clarifying major misconceptions that are currently prevailing regarding Roof top Rainwater harvesting especially within the low capacity aquifers within the hard rock terrain of the Deccan basalts

Smart & Sustainable Infrastructure: Building a Greener Tomorrow Nemkumar Banthia, Salman Soleimani-Dashtaki, Sidney Mindess, 2024-02-19 This book gathers peer reviewed contributions presented at the 1st Interdisciplinary Symposium on Smart Sustainable Infrastructure ISSSI held in Vancouver BC Canada on September 4 8 2023 and affiliated with the 77th RILEM Annual Week 2023 Aiming at creating an environment of mutual cooperation between experts in materials and structures it covers topics such as sensors IoT and structural health monitoring AI and machine learning data analytics for infrastructure management nanotechnology additive manufacturing smart and bioinspired materials durability of materials and structures resilience to earthquakes floods fire and blast carbon reduction in construction and operations and sustainable ultra high performance materials The contributions which were selected through a rigorous international peer review process share exciting ideas that will spur novel research directions and foster new multidisciplinary collaborations

*Climate Resilient, Green and Low Carbon Built Environment* Ashok Kumar Jain, 2023-04-26 This book constitutes state of the art research covering a wide range of topics including climate change and carbon emissions air quality and pollution control urbanism land and circular economy sustainable transport energy water biodiversity and greenery environmental services housing and construction with respect to the built environment The concepts of sustainability in built environment conclude with reimagining the city The content includes pedagogical features such as examples simple flowing language and over 100 figures The book aims to motivate architects engineers consultants builders and planners to respond to the challenges of sustainability in the built environment
