Educating the next generation of scientists Great Britain: Parliament: House of Commons: Committee of Public Accounts, 2011-01-20 A strong supply of people with science technology engineering and maths skills is important for the UK to compete internationally The starting point is a good education for children and young people in science and maths The numbers studying separate GCSE biology chemistry and physics known as Triple Science when studied together have risen by almost 150% between 2004 05 and 2009 10 Attainment has also improved as take up has increased Nevertheless there is a risk that this progress will not be maintained There are still not enough teachers with strong subject knowledge in science and maths entering the profession In 2009 10 there were over 115 000 entries to GCSE biology 113 000 to chemistry and 112 000 to physics Another 40 000 pupils entered A level chemistry and almost 70 000 A level maths If the higher numbers of pupils taking science and maths are to achieve good results they need to be taught by teachers with the specialist knowledge to teach these subjects well Teaching environments are also vitally important in improving take up and achievement in science but there is evidence that science facilities in many schools are unsatisfactory and even unsafe Furthermore in some schools advice and guidance on science and maths related careers is poor The Department must approach the challenge of improving school science and maths through a coherent system wide strategy rather than as a number of initiatives

Baccalaureate Great Britain: Parliament: House of Commons: Education Committee,2011-07-28 This report suggests that any new performance or curriculum measures affecting schools should only be implemented after proper consultation with key stakeholders and the wider public something which didn't happen with the English Baccalaureate EBac The Committee says that the Government should also have waited until after the conclusion of the National Curriculum Review before introducing the EBac They want the Government to deliver on its promise in the White Paper *The Importance of Teaching* to use performance tables to put greater emphasis on the progress of every child The report notes that certain academic subjects studied at A level are more valued by Russell Group universities than others but argues that a focus on a fairly narrow range of subjects demanding considerable curriculum time is likely to have negative consequences on the uptake of other subjects The Committee does not make recommendations on which subjects should or should not be included but rather encourages the Government to reconsider the EBac's composition when the National Curriculum Review is concluded The Government should confirm how it will monitor the attainment of children on free school meals in the EBac The report also calls for further international evidence to inform debate on the merits of the EBac evidence the inquiry received did not suggest a link in other countries between the prescribed study of certain academic subjects and improved attainment and prospects for poorer students Elsewhere the report argues that the current arrangements for certification of the EBac should be shelved as should calls for a Technical Baccalaureate to sit alongside the existing award **GCSE Intermediate Maths**

Young Working-Class Men in Transition Steven Roberts,2018-06-27 *Young Working Class Men in Transition* uses a unique blend of concepts from the sociologies of youth and masculinity combined with Bourdieusian social theory to investigate British young working class men's transition to adulthood Indeed utilising data from biographical interviews as

well as an ethnographic observation of social media activity this volume provides novel insights by following young men across a seven year time period Against the grain of prominent popular discourses that position young working class men as in crisis or as adhering to negative forms of traditional masculinity this book consequently documents subtle yet positive shifts in the performance of masculinity among this generation Underpinned by a commitment to a much more expansive array of emotionality than has previously been revealed in such studies young men are shown to be engaged in school open to so called women s work in the service sector and committed to relatively egalitarian divisions of labour in the family home Despite this class inequalities inflect their transition to adulthood with the toxicity of neoliberalism rather than toxic masculinity being core to this reality Problematising how working class masculinity is often represented *Young Working Class Men in Transition* both demonstrates and challenges the portrayal of working class masculinity as a repository of homophobia sexism and anti feminine acting It will appeal to students and researchers interested in fields such as youth studies masculinity studies gender studies sociology of education and sociology of work
