suitable for business critical systems Understand how to migrate your SAP infrastructure to Azure Use Lift shift migration Lift
migrate Lift migrate to HANA or Lift transform to S 4 HANA Book Description Cloud technologies have now reached a level
where even the most critical business systems can run on them For most organizations SAP is the key business system If SAP
is unavailable for any reason then potentially your business stops Because of this it is understandable that you will be
concerned whether such a critical system can run in the public cloud However the days when you truly ran your IT system on
premises have long since gone Most organizations have been getting rid of their own data centers and increasingly moving to
co location facilities In this context the public cloud is nothing more than an additional virtual data center connected to your
existing network There are typically two main reasons why you may consider migrating SAP to Azure You need to replace the
infrastructure that is currently running SAP or you want to migrate SAP to a new database Depending on your goal SAP
offers different migration paths You can decide either to migrate the current workload to Azure as is or to combine it with
changing the database and execute both activities as a single step SAP on Azure Implementation Guide covers the main
migration options to lead you through migrating your SAP data to Azure simply and successfully What you will
learn Successfully migrate your SAP infrastructure to Azure Understand the security benefits of Azure See how Azure can scale
to meet the most demanding of business needs Ensure your SAP infrastructure maintains high availability Increase business
