Handbook Endangered Marine Life:

A Handbook of Endangered Marine Life Ramasamy Santhanam, 2015-12-15 Presently marine biodiversity is under great threat which is largely due to several unwanted man made and environmental factors It therefore warrants urgent conservation and management measures in order to safeguard the existing endangered and critically endangered marine species from further extinction Awareness has also to be created among sea goers marine tourists recreational fishers and general public to protect such marine species for the betterment of our future generations Keeping the above in consideration the present publication is being brought out It deals with world marine species which are under endangerment critical endangerment and vulnerable attaining early endangerment categories For each species its common name classification habitat global distribution diagnostic characters and threats have been elaborately dealt with *Handbook of Fish Biology and Fisheries* Paul J. B. Hart, John D. Reynolds, 2008-04-15 Recent decades have witnessed strong declines in fish stocks around the globe amid growing concerns about the impact of fisheries on marine and freshwater biodiversity Fisheries biologists and managers are therefore increasingly asking about aspects of ecology behaviour evolution and biodiversity that were traditionally studied by people working in very separate fields This has highlighted the need to work more closely together in order to help ensure future success both in management and conservation The Handbook of Fish Biology and Fisheries has been written by an international team of scientists and practitioners to provide an overview of the biology of freshwater and marine fish species together with the science that supports fisheries management and conservation This volume subtitled Fisheries focuses on a wide range of topics including the history of fisheries science methods of capture marketing economics major models used in stock assessments and forecasting ecosystem impacts marine protected areas and conservation It builds on material in Volume 1 Fish Biology which ranges from phylogenetics and biogeography to physiology recruitment life histories genetics foraging reproductive behaviour and community ecology Together these books present the state of the art in our understanding of fish biology and fisheries and will serve as valuable references for undergraduates and graduates looking for a comprehensive source on a wide variety of topics in fisheries science They will also be useful to researchers who need up to date reviews of topics that impinge on their fields and decision makers who need to appreciate the scientific background for management and conservation of aquatic ecosystems To order volume II go to the box in the top right hand corner Alternatively to order volume I go to <http://www.blackwellpublishing.com/book.asp/ref/0632054123> or to order the 2 volume set go to <http://www.blackwellpublishing.com/book.asp/ref/0632064838> Provides a unique overview of the study of fish biology and ecology and the assessment and management of fish populations and ecosystems The first volume concentrates on aspects of fish biology and ecology both at the individual and population levels whilst the second volume addresses the assessment and management of fish populations and ecosystems Written by an international team of expert scientists and practitioners An invaluable reference tool for both students researchers and

practitioners working in the fields of fish biology and fisheries Coastal Zone Management Handbook John R. Clark, 2018-05-04 Coastal Zone Management Handbook comprises the first complete manual on coastal resource planning and management technology Written by an international consultant this handbook reflects a global perspective on the natural resources sensitivities economics development productivity and diversity of coastal zones The emphasis is on tropical and subtropical coastal ecosystems but the information is widely applicable In addition to its comprehensive coverage of general concepts related to coastal regions the book describes the strategic basis for coastal management provides a set of working tools for management and planning activities and presents case histories of management projects around the globe Extensive references are provided for each management analysis practice technique and solution Coastal Zone Management Handbook is made up of four sections Handbook of Marine Mammals Sam H.
