Aging and Neuropsychological Assessment Asenath LaRue, 2013-06-29 It is a privilege to be asked to write the foreword for so excellent a book so timely and so much needed by the field Not only is it most unusual these days to have a single authored volume on so broad a topic but Dr La Rue has done a superb job of providing both a scholarly treatise and a practical handbook With a burgeoning elderly population and the corresponding increase in geriatric psychopathology the needs of mental health services are exceeding by far the supply of appropriate providers In an effort to meet this need psychiatry medicine neurology pharmacology psychology nursing and social work have all made the provision of training in geriatrics and gerontology a high priority but I fear we are losing the race For example multidisciplinary teams that assess diagnose and treat mental health disorders in elderly patients are incomplete without clinical psychologists and neuropsychologists and yet there is barely a handful of clinical psychologists trained in dealing with geriatric patients We can count on our fingers the additional ones graduated each year In hospitals clinics and private practices across the country otherwise skilled psychologists are unprepared to respond to the special mental health needs of the elderly A few CME programs are helping to address this need but they are clearly not enough

Contemporary Approaches to Neuropsychological Assessment Gerald Goldstein, Theresa M. Incagnoli, 2013-06-29 This volume reflects in part an update of *Clinical Application of Neuropsychological Test Batteries* edited by Theresa Incagnoli Gerald Goldstein and Charles Golden some 10 years ago While the initial concept of the present editors involved doing a straightforward update of each chapter it soon became apparent that the field of clinical neuropsychology had changed so dramatically and rapidly that substantial changes in the outline had to be made It was our view that sufficient interest remained in the standard comprehensive neuropsychological test batteries to make an update worthwhile We asked four senior people to take on this assignment James Moses Jr and Arnold Purisch in the case of the Luria Nebraska Battery and James Reed and Homer Reed for the Halstead Reitan Battery These individuals all have long term associations with these procedures and can be viewed as pioneers in their development However it also seemed to us that there was an increasing interest in the psychometric aspects of the standard procedures and in assessment issues related to the relative merits of using standard or individualized assessment strategies Thus we have chapters by Elbert Russell and Gerald Goldstein that provide discussions of these current methodological and clinical issues During the past 10 years the cognitive revolution has made a strong impact on neuropsychology The interest of cognitive psychologists in brain function has increased dramatically and we now have an active field of cognitive neuropsychology something that was only beginning 10 years ago

Practitioner's Guide to Evaluating Change with Intellectual Assessment Instruments Robert J. McCaffrey, Holly James Westervelt, 2013-03-14 While conducting research on intellectual and neuropsychological performance of various patient populations across time we became aware of the lack of information concerning practice effects associated with many widely used assessment instruments Although test retest data were available for almost all of these instruments it typically came in the form of correlation coefficients and mean changes in performance between assessments was often absent In a 1995 article McCaffrey Westervelt 1995 we discussed a number of issues relevant to serial neuropsychological and intellectual assessment and concluded that clinical neuropsychological practitioners had few guidelines to assist them in interpreting change in a patient's performance across assessments This volume represents our efforts at reviewing the literature between 1970 and 1998 and extracting the reported information on

practice effects The tables include the assessment instrument used information on the subject patient groups the sample size n gender age intervention interval between the assessments scores at both assessment points and the citation The tables reflect the existing published literature within intellectual assessment and therefore some instruments e g Wechsler tests comprise a majority of the tables whereas others e g Raven s Progressive Matrices Stanford Binet do not The test index is arranged by the name of the test as reported in the specific article We caution readers to refer to the original articles if additional or more specific information is needed

Psychopathology in Later Adulthood Susan Krauss

Whitbourne,2000-09-22 A comprehensive review of psychopathology in older adults combining theory research and practice The tremendous growth of the aging population has dramatically increased the importance of clinical geropsychology as a major area of research theory and practice The unique ways in which psychological disorders manifest in the later years of life create special challenges for professionals working with older clients Edited by a well known expert in aging and with contributions from leading clinical researchers Psychopathology in Later Adulthood addresses the assessment diagnosis and treatment issues health professionals encounter in late adulthood Combining theory research and case examples this book explores both the physical and cognitive changes that occur as adults age Each chapter focuses on a specific disorder and includes a relevant clinical case study which is integrated into the substantive content Some of the subjects covered are Personality anxiety mood and sexual disorders Dementia Suicide Substance abuse disorders Schizophrenia and related disorders Sleep related disorders General principles of therapy Thorough and practical Psychopathology in Later Adulthood provides the reader with the insight needed to understand and successfully treat the complex aspects of aging

Practitioner's Guide to Evaluating Change with Neuropsychological Assessment Instruments Robert J.

McCaffrey,Kevin Duff,Holly James Westervelt,2013-11-11 The impetus for this volume began with our research in the 1980 s involving serial neuropsychological evaluation with various patient populations At that time reports on the practice effects associated with routinely utilized clinical neuropsychological instruments were sparse While test retest data were available for almost all assessment instruments this was usually in the form of correlation coefficients and not changes in mean performance between or across assessment periods see McCaffrey Westervelt 1995 for a detailed discussion of these and related issues Clinical neuropsychological practitioners had few guidelines to assist them in determining if a change in a patient s performance across assessments was due to an intervention maturation practice effects or a combination of factors This volume represents our efforts at reviewing the literature between 1970 and 1998 and extracting the reported information on practice effects The tables include the assessment instrument used information on the subject patient groups the sample size n gender age intervention interval between the assessments scores at both assessment points and the citation Those studies that reported data on more than two assessment points are indicated by a notation however any data beyond the second assessment are not reported and the interested reader should refer to the original article The tables are

arranged alphabetically for the most widely used assessment instruments Those instruments for which there was limited data on practice effects are grouped by domain e.g. *Neuropsychotherapy and Community Integration* Tedd Judd, 2012-12-06

The first time I walked onto a neurology ward during my graduate training I was shocked much as family members of people with brain illnesses probably are I had learned a great deal in class about aphasia amnesia agnosia apraxia and other cognitive disorders but I had not been prepared for the behavioral disorders I was to encounter for the severe physical disabilities for the indignities of the patient role Bit by bit I overcame this shock I learned to look people in the eye who seemed to have more tubes than the New York subway system people whose faces had been scraped off the pavement and who were drooling incontinent and severely dysarthric I learned to see beyond what frightened and repulsed me to the human beings within I wish I could say that I saw in each person a deep human soul yearning to breathe free and to love an essence an intrinsic goodness a wholeness I did not Rather it seems like each and every unique element of human behavior one's abilities and one's desires can be destroyed by some brain lesion while leaving a uniquely human person behind Not only are there losses but behaviors emerge at times that are not seen in people with intact brains but which still reveal a human attempting to cope I do feel that I saw and still see in each such person something intrinsically human but not the same thing in each

Reliability and Validity in Neuropsychological Assessment Michael D. Franzen, 2013-11-21 No other book reviews clinical neuropsychological assessment from an empirical psychometric perspective In this completely revised and updated 2nd edition the concepts and methods of psychometric neuropsychology are presented as a framework by which to evaluate current instruments Newer methodologies and statistical techniques are discussed such as meta analysis effect size confirming factor analysis and ecological validity The explosion of research in this area since the publication of the first edition in 1989 has been incorporated including a greatly expanded chapter on child assessment instruments This volume is a must for the bookshelf of every clinical neuropsychologist as well as researchers and students Anyone conducting forensic evaluations will especially find useful the information on reliability and validity when preparing for court appearances
