Kolekar, Arpan Kumar Kar, Jitender Kumar Chhabra, Abhijit Sen, 2021-01-12 This book features selected papers presented at the 3rd International Conference on Recent Innovations in Computing ICRIC 2020 held on 20-21 March 2020 at the Central University of Jammu India and organized by the university's Department of Computer Science Information Technology. It includes the latest research in the areas of software engineering, cloud computing, computer networks and Internet technologies, artificial intelligence, information security, database and distributed computing and digital India.

Biometrics Michael C. Fairhurst, 2018 With the rise of digital technologies the need for effective means of identification has grown enormously. Biometrics is the rapidly growing science of identifying individuals through biological characteristics from iris patterning to voice recognition. This book introduces biometrics, what it can do today and future possibilities.

Artificial Intelligence Applications and Innovations Ilias Maglogiannis, Lazaros Iliadis, Andreas Andreou, Antonios Papaleonidas, 2025-06-21 This four volume set constitutes the proceedings of the 21st IFIP WG 12.5 International Conference on Artificial Intelligence Applications and Innovations AIAI 2025 which was held in Limassol, Cyprus during June 2025. The 123 full papers and 7 short papers were presented in this volume were carefully reviewed and selected from 303 submissions. They focus on ethical/moral AI aspects related to its Environmental impact, Privacy, Transparency, Bias, Discrimination and Fairness.

Crime Reconstruction W. Jerry Chisum, Brent E. Turvey, 2011-08-09 Crime Reconstruction Second Edition is an updated guide to the interpretation of physical evidence written for the advanced student of forensic science, the practicing forensic generalist and those with multiple forensic specialties. It is designed to assist reconstructionists with understanding their role in the justice system, the development and refinement of case theory and the limits of physical evidence interpretation. Chisum and Turvey begin with chapters on the history and ethics of crime reconstruction and then shift to the more applied subjects of reconstruction methodology and practice standards. The volume concludes with chapters on courtroom conduct and evidence admissibility to prepare forensic reconstructionists for what awaits them when they take the witness stand. Crime Reconstruction Second Edition remains an unparalleled watershed collaborative effort by internationally known qualified and respected forensic science practitioners holding generations of case experience among them. Forensic pioneer such as W. Jerry Chisum, John D. DeHaan, John I. Thorton and Brent E. Turvey contribute chapters on crime scene investigation, arson reconstruction, trace evidence interpretation, advanced bloodstain interpretation and ethics. Other chapters cover the subjects of shooting incident reconstruction, interpreting digital evidence, staged crime scenes and examiner bias. Rarely have so many forensic giants collaborated and never before have the natural limits of physical evidence been made so clear. Updates to the majority of chapters to comply with the NAS Report. New chapters on forensic science crime scene investigation, wound pattern analysis, sexual assault reconstruction and report writing. Updated with key terms, chapter summaries, discussion questions and a comprehensive glossary, ideal for those teaching forensic science and crime reconstruction subjects at the college level. Provides clear

practice standards and ethical guidelines for the practicing forensic scientist State of the art in Biometrics Jucheng Yang,Loris Nanni,2011-07-27 Biometric recognition is one of the most widely studied problems in computer science The use of biometrics techniques such as face fingerprints iris and ears is a solution for obtaining a secure personal identification However the old biometrics identification techniques are out of date This goal of this book is to provide the reader with the most up to date research performed in biometric recognition and describe some novel methods of biometrics emphasis on the state of the art skills The book consists of 15 chapters each focusing on a most up to date issue The chapters are divided into five sections fingerprint recognition face recognition iris recognition other biometrics and biometrics security The book was reviewed by editors Dr Jucheng Yang and Dr Loris Nanni We deeply appreciate the efforts of our guest editors Dr Girija Chetty Dr Norman Poh Dr Jianjiang Feng Dr Dongsun Park and Dr Sook Yoon as well as a number of anonymous reviewers

Handbook of Biometrics for Forensic Science Massimo Tistarelli,Christophe Champod,2017-02-01 This comprehensive handbook addresses the sophisticated forensic threats and challenges that have arisen in the modern digital age and reviews the new computing solutions that have been proposed to tackle them These include identity related scenarios which cannot be solved with traditional approaches such as attacks on security systems and the identification of abnormal dangerous behaviors from remote cameras Features provides an in depth analysis of the state of the art together with a broad review of the available technologies and their potential applications discusses potential future developments in the adoption of advanced technologies for the automated or semi automated analysis of forensic traces presents a particular focus on the acquisition and processing of data from real world forensic cases offers an holistic perspective integrating work from different research institutions and combining viewpoints from both biometric technologies and forensic science

Handbook of Biometric Anti-Spoofing Sébastien Marcel,Mark S. Nixon,Julian Fierrez,Nicholas Evans,2019-01-01 This authoritative and comprehensive handbook is the definitive work on the current state of the art of Biometric Presentation Attack Detection PAD also known as Biometric Anti Spoofing Building on the success of the previous pioneering edition this thoroughly updated second edition has been considerably expanded to provide even greater coverage of PAD methods spanning biometrics systems based on face fingerprint iris voice vein and signature recognition New material is also included on major PAD competitions important databases for research and on the impact of recent international legislation Valuable insights are supplied by a selection of leading experts in the field complete with results from reproducible research supported by source code and further information available at an associated website Topics and features reviews the latest developments in PAD for fingerprint biometrics covering optical coherence tomography OCT technology and issues of interoperability examines methods for PAD in iris recognition systems and the application of stimulated pupillary light reflex for this purpose discusses advancements in PAD methods for face recognition based biometrics such as research on 3D facial masks and remote photoplethysmography rPPG presents a survey of PAD for automatic speaker recognition ASV including

the use of convolutional neural networks CNNs and an overview of relevant databases describes the results yielded by key competitions on fingerprint liveness detection iris liveness detection and software based face anti spoofing provides analyses of PAD in fingervein recognition online handwritten signature verification and in biometric technologies on mobile devices includes coverage of international standards the E U PSDII and GDPR directives and on different perspectives on presentation attack evaluation This text reference is essential reading for anyone involved in biometric identity verification be they students researchers practitioners engineers or technology consultants Those new to the field will also benefit from a number of introductory chapters outlining the basics for the most important biometrics
