*Ships and Offshore Structures XIX* Carlos Guedes Soares,Y. Garbatov,2015-09-03 This three volume work presents the proceedings from the 19th International Ship and Offshore Structures Congress held in Cascais Portugal on 7th to 10th September 2015 The International Ship and Offshore Structures Congress ISSC is a forum for the exchange of information by experts undertaking and applying marine structural research The aim of **Coupled**

**Thermo-Hydro-Mechanical-Chemical Processes in Geo-systems** Ove Stephansson,John Hudson,Lanru Jing,2004-11-03 Among the most important and exciting current steps forward in geo engineering is the development of coupled numerical models They represent the basic physics of geo engineering processes which can include the effects of heat water mechanics and chemistry Such models provide an integrating focus for the wide range of geo engineering disciplines The articles within this volume were originally presented at the inaugural GeoProc conference held in Stockholm and contain a collection of unusually high quality information not available elsewhere in an edited and coherent form This collection not only benefits from the latest theoretical developments but also applies them to a number of practical and wide ranging applications Examples include the environmental issues around radioactive waste disposal deep in rock and the search for new reserves of oil and gas **2023 International Conference on Marine Equipment & Technology and Sustainable Development**

Desen Yang,2023-08-01 This book contains original peer reviewed and selected research papers that were presented at the 2023 International Conference on Marine Equipment Technology and Sustainable Development which took place in Beijing China on April 1st 2023 The papers cover a range of topics including but not limited to the vision and goals of building a maritime community with a shared future marine machinery and transportation marine ecology environmental protection and conservation marine safety future ships and marine equipment marine engineering marine information and technology maritime policy and global governance The papers included in this volume provide the latest findings on methodologies algorithms and applications in marine equipment and technology as well as sustainable development As a result this book is an invaluable resource for researchers engineers and university students who are interested in these fields

*Glacially-Trigged Faulting* Holger Steffen,Odleiv Olesen,Raimo Sutinen,2021-12-16 Glacially triggered faulting describes movement of pre existing faults caused by a combination of tectonic and glacially induced isostatic stresses The most impressive fault scarps are found in northern Europe assumed to be reactivated at the end of the deglaciation This view has been challenged as new faults have been discovered globally with advanced techniques such as LiDAR and fault activity dating has shown several phases of reactivation thousands of years after deglaciation ended This book summarizes the current state of the art research in glacially triggered faulting discussing the theoretical aspects that explain the presence of glacially induced structures and reviews the geological geophysical geodetic and geomorphological investigation methods Written by a team of international experts it provides the first global overview of confirmed and proposed glacially induced

faults and provides an outline for modelling these stresses and features It is a go to reference for geoscientists and engineers interested in ice sheet solid Earth interaction      **Trends in Collision and Grounding of Ships and Offshore Structures**
