Albert Einstein - Excerpts from Ideas and opinions Terry Haass, Albert Einstein (Physicien, Allemagne, Suisse, Etats-Unis), 1975 **Einstein and Twentieth-Century Politics** Richard Crockatt, 2016-09-22 Albert Einstein world renowned as a physicist was also publicly committed to radical political views Despite the vast literature on Einstein Einstein and Twentieth Century Politics is the first comprehensive study of his politics covering his opinions and campaigns on pacifism Zionism control of nuclear weapons world government freedom and racial equality Most studies look at Einstein in isolation but here he is viewed alongside a liberal international of global intellectuals including Gandhi Albert Schweitzer Bertrand Russell H G Wells George Bernard Shaw Romain Rolland Thomas Mann and John Dewey Frequently called upon to join campaigns on great issues of war peace and social values they all knew or corresponded with Einstein This volume examines how Einstein and comparable intellectuals sought to exert a salutary influence as Einstein put it in a letter to Freud Close attention is given to the unique qualities Einstein brought to his interventions in political debate His influence derived in the first instance from his celebrity status as the scientist of genius whose theory of relativity was both incomprehensible to most and seemingly relevant to many aspects of aspects of culture and the cosmos Einstein's complex and enigmatic personality which combined intense devotion to privacy and a capacity to perform on the public stage also contributed to the Einstein myth Studying Einstein's politics it is argued here takes us not only into the mind of Einstein but to the heart of the great public issues of the twentieth century

cottages of the wage earners They come from a peculiar type of brainy people always found in our country who if they add something to its culture take much from its strength Our difficulties come from the mood of unwarrantable self abasement into which we have been cast by a powerful section of our own intellectuals They come from the acceptance of defeatist doctrines by a large proportion of our politicians But what have they to offer but a vague internationalism a squalid materialism and the promise of impossible Utopias Winston Churchill England 24 April 1933 Royal Society of St George London

Ronald L. Numbers, 2010-11-08 If we want nonscientists and opinion makers in the press the lab and the pulpit to take a fresh look at the relationship between science and religion Ronald Numbers suggests that we must first dispense with the hoary myths that have masqueraded too long as historical truths Until about the 1970s the dominant narrative in the history of science had long been that of science triumphant and science at war with religion But a new generation of historians both of science and of the church began to examine episodes in the history of science and religion through the values and knowledge of the actors themselves Now Ronald Numbers has recruited the leading scholars in this new history of science to puncture the myths from Galileo's incarceration to Darwin's deathbed conversion to Einstein's belief in a personal God who didn't play dice with the universe The picture of science and religion at each other's throats persists in mainstream media and scholarly journals but each chapter in *Galileo Goes to Jail* shows how much we have to gain by seeing beyond the myths *Einstein on*

The Case for the Humanities Eric Touya de Marenne, 2016-12-01. Countering the perception that the humanities are unessential, this volume contends that their well-being has not only academic but also cultural, political and existential ramifications. Our technologically driven world possesses the means of its own destruction while economic and financial policies undermine the very existence of our democracy. At the same time, the postmodern and post-human age fundamentally challenges our ability and legitimacy to conceive future ideals. It is within this context that the humanities provide essential paths through which the teaching and knowledge of other academic fields such as STEM and economics must be re-envisioned. In short, the humanities must be brought back to the center of academic life. The political and pedagogical implications of this interdisciplinary study thus entail a renewed critique to rethink the relation between higher education, society and the world at large, politically, economically, scientifically and technologically, and the importance of the humanities within it. At the heart of this reconsideration, the humanities and humanity's fate and future become one.
