Ideologies Of Globalization Ideologies Of Globalization:

Ideologies of Globalization Mark Rupert, 2000 This work examines the key debates about globalization and provides an analysis of the varied and often contradictory opposition to globalization within the United States *Globalism* Manfred B. Steger, 2002 *Globalism* The New Market Ideology rejects the notion that we find ourselves at the end of ideology and that democracy has won Instead Steger argues that the opening decade of the 21st century will constitute a teeming battlefield of clashing ideologies The chief protagonist is the dominant neoliberal market ideology Steger calls globalism After identifying and evaluating the five central claims of globalism including assertions that globalization is inevitable nobody is in charge of globalization and globalization benefits everyone Steger offers an overview of the counterclaims made by anti globalist forces Visit our website for sample chapters **Globalization and Urban Development** Harry W. Richardson, Chang-Hee C.

Bae, 2006-03-30 Most research on globalization has focused on macroeconomic and economy wide consequences This book explores an under researched area the impacts of globalization on cities and national urban hierarchies especially but not solely in developing countries Most of the globalization urban research has concentrated on the global cities e g New York London Paris Tokyo that influence what happens in the rest of the world In contrast this research looks at the cities at the receiving end of the forces of globalization The general finding is that large cities on balance benefit from globalization although in some cases at the expense of widening spatial inequities Globalisms Manfred B. Steger, 2008-12-16 This new edition of Manfred Steger's award winning book explores the three principal ideologies of our time the dominant market globalism based on a neoliberal vision of the world as a single marketplace the justice globalism developed over the last decade by a transnational coalition of global civil society forces and the jihadist globalism of radical Islamists seeking to galvanize their global community of believers into violent action Market globalism has responded to these challengers by turning into imperial globalism a political belief system that marries the capitalist language of the 1990s with the security concerns of our post 9 11 world Steger one of the world's leading scholars on these subjects explores globalization's central questions What exactly are the core claims of these conflicting globalisms How does the imperial globalism of the 2000s differ from the market globalism of the 1990s How has justice globalism managed to mature into a coherent ideology What are the most likely future trajectories of this great ideological struggle of the twenty first century Written with impressive historical and theoretical breadth this groundbreaking work is essential reading for all those concerned with the key questions that our shrinking world must face **Globalization and Ideology** Manfred B. Steger, 2025-02-06 This text

Allegory and Ideology Fredric Jameson, 2020-11-17 Fredric Jameson takes on the allegorical form Works do not have meanings they soak up meanings a work is a machine for libidinal investments including the political kind It is a process that sorts incommensurabilities and registers contradictions which is not the same as solving them The inevitable and welcome conflict of interpretations a discursive ideological struggle therefore needs to be supplemented by an account of this simultaneous processing of multiple meanings rather than an abandonment to liberal pluralisms and tolerant or intolerant relativisms This is not a book about method but it does propose a dialectic capable of holding together in one breath the heterogeneities that reflect our biological individualities our submersion in collective history and class struggle and our alienation to a disembodied new world of information and abstraction Eschewing the arid secularities of philosophy Walter Benjamin once recommended the

alternative of the rich figurality of an older theology in that spirit we here return to the antiquated Ptolemaic systems of ancient allegory and its multiple levels a proposal first sketched out in *The Political Unconscious* it is tested against the epic complexities of the overtly allegorical works of Dante Spenser and the Goethe of *Faust II* as well as symphonic form in music and the structure of the novel postmodern as well as Third World about which a notorious essay on National Allegory is here reprinted with a theoretical commentary and an allegorical history of emotion is meanwhile rehearsed from its contemporary geopolitical context
