**Implementation of IEC/IEEE 82079-1 Ed. 2** Martin Tillmann, Martin Rieder, Claudia Klumpp, Michael Fritz, Roland Schmeling, Stephan Schneider, 2025-07-31 IEC IEEE 82079 1 is of exelling importance for the field of technical communication Since its publication in 2012 it defines the general principles and requirements for instructions for use in all industry branches In a five year effort the standard has been substantially revised by an international work group formed by 21 experts from nine countries This implementation guide focuses on the practical application of the standard and in this effort largely follows the improved structure of the standard All chapters referring to specific requirements of the standard include a table presenting the mandatory requirements of the respective section The following subchapters then discuss the requirements and their implementation including practical examples The tekomp practical implementation guide thus is ideally suited to understanding the requirements set forth in the standard and their implementation Thanks to its structure following that of the standard it can also be used as a reference

Impeccability of the Source Text in Translations Luis R. Cerna, 2025-04-16 Most scholars concentrate on translation quality assessment in the target language The quality of source texts in the translation process is only exceptionally considered This publication explains some emerging problems linguistic experts are facing when source texts are deficient analysing the impeccability of the source text in translations by adopting a critical perspective on the impeccability of such texts and shows how difficult it sometimes is to drain a useful source text as a safe basis for high quality technical translations
