

Introduction

The LW Scientific E8 is available in the E8F (Fixed speed), E8V (Variable speed), and E8D (Digital speed). The E8F is an 8-place centrifuge that is designed for blood separations at a fixed speed of 3500 rpm only (1534 g-force). The E8V and E8D will separate blood at 3500 rpm and can be slowed to separate other fluids at lower g-force, such as urine specimens as outlined by C.L.A. regulations.

Features

30-minute mechanical timer (E8F and E8V), ON/OFF switch (indicator light), 8-tube capacity (3-15ml), lid safety switch (unlocking the lid turns the centrifuge off), one-piece plastic housing, high impact plastic lid allows for observation of samples and strobing for speed calibrations.

Installation and Set-up

- 1 Remove the centrifuge from the shipping container and inspect for any possible shipping damage. If the centrifuge appears to be damaged from shipping, please contact your distributor immediately.
- 2 Read and fill out the warranty form online. The warranty form documents your purchase. Failure to complete the warranty form may void any warranty claims on the unit.
- 3 Place the centrifuge on a sturdy, level surface. Unlock lid latch (U) and open to verify that there are no loose objects or packing material in the tube chamber and that all tube shields are properly "sealed."
- 4 The large plastic tube shields are designed to hold large test tubes up to 15ml, and the smaller tube shields fit inside the large shields for spinning shorter test tubes (75mm length). Special size rubber cushions can be ordered from LW Scientific. Verify that all tubes are installed and balanced (See 7 below).
- 5 Verify that the power switch on the front of the unit is in the OFF position. Connect the power cable to the power supply adapter, and then connect the power supply adapter to the back of the centrifuge. Plug the power cable into an approved and properly grounded outlet. **Do not insert specimen tubes at this time!**
- 6 Close the lid, turn the latch to the (L) position and turn power switch ON. For fixed and variable units, turn the timer to 5 minutes. For digital units, adjust speed to 3500rpm, set the timer to 5 minutes, and press RUN. If there is a smooth whining sound and the unit accelerates with little or no vibration, your E8 centrifuge is ready to operate. If there are loud, unusual sounds or if you experience excessive vibration, immediately turn the unit off. **DO NOT OPERATE** - Contact your dealer or LW Scientific, Inc.
- 7 Spin only balanced loads. Make sure that all tube shields are filled with equal weight tubes. Tubes of equal weight and size should be placed opposite each other. Use water-filled tubes to provide balance if necessary. Proper sample balancing will improve sample separation and will extend the life of the centrifuge. Out of balance loads may break glass test tubes. **DO NOT OPEN WHILE SPINNING.**

Iec Centrifuge Instruction Manual

R Pring

Iec Centrifuge Instruction Manual:

As recognized, adventure as skillfully as experience nearly lesson, amusement, as without difficulty as bargain can be gotten by just checking out a ebook **Iec Centrifuge Instruction Manual** then it is not directly done, you could consent even more approaching this life, not far off from the world.

We provide you this proper as skillfully as simple pretentiousness to acquire those all. We allow Iec Centrifuge Instruction Manual and numerous ebook collections from fictions to scientific research in any way. accompanied by them is this Iec Centrifuge Instruction Manual that can be your partner.
