LP GAS ENGINE AND FUEL SYSTEM

Fig. 1
LP Gas Fuel System

PRINCIPAL ELEMENTS

Principal elements of this LP Gas fuel system include the fuel tank assembly with valves and gauges, fuel lines, pipes and connections, carburetor, fuel regulator, regulator unit, fuel filter, and a cold start valve. These elements are specifically designed and installed to perform efficiently, economical operation on LP Gas fuel as described below.

1. The fuel tank is of heavy gauge welded steel construction complete with valves and gauges designed to withstand a pressure of 100 pounds per square inch. It is fabricated with a tank of a pressure of 100 pounds per square inch and has a working pressure of 110 pounds per square inch. A strong tank is necessary because the LP Gas fuel is stored in a liquid state under pressure, which varies with the temperature.

2. The regulator/regulator unit is supplied to change the liquid fuel at tank pressure to a dry gas at slightly below atmospheric pressure.

3. The carburetor is especially designed for LP Gas fuel and has an economizer for low ground fuel economy under light loads.

GENERAL INFORMATION

Note: It is recommended that LP Gas fuel meeting the National Gas Processors' Association (NGPA) specifications for Propane M1 be used if available.

In the normal temperature range, the fuel in the tank will be under pressure of about a few pounds up to the pounds per square inch. The pressure in the LP Gas tank is determined by the temperature and the type of fuel in it. For example, normal liquid propane boils at -42°F , and liquid propane boils at -44°F . A mixture of the two liquid fuels have boiling points between these two temperatures. As the temperature of the tank and the contents rises, the pressure in the tank also increases. This pressure and higher vapors are heavier than air and will tend to settle in a low spot back of the closed tank out of the tank. There should be holes to vent that these spots are ventilated thoroughly before any spark or flame is produced, if the unit is used near such a location.
