Mapping Research and Innovation in the Republic of Kenya

UNESCO, 2023-09-27 The Report: Kenya 2016 Oxford Business Group, 2015-12-15. The Kenyan economy performed comparatively well in 2015 even in the face of global economic headwinds. According to the World Bank, GDP growth is expected to reach 5.4% for the year, aided in large part by sustained public sector capital spending. The country has a strong private sector and received encouraging signs of new oil, gas, and water reserves which, if harnessed appropriately, bode well for future growth. The country's medium to long term economic outlook is robust. With over 40% of the population under the age of 15, Kenya stands to benefit from a significant demographic dividend provided that sufficient jobs can be found when this population enters the workforce. The country has a reasonably sized industrial base, competitive infrastructure, and a large agricultural sector, all of which offer opportunities for capital intensive investment.

Higher Education and Policy for Creative Economies in Africa Roberta Comunian, Brian J. Hrac, Lauren England, 2020-11-04. The book reflects on the role of the creative economies in a range of African countries, namely Ghana, Kenya, Nigeria, South Africa, and Uganda. Chapters explore how creative economies emerge and can be supported in African countries. The contributors focus on two key dimensions: the role of higher education and the role of policy. Firstly, they consider the role of higher education and alternative forms of specialised education to reflect on how the creative aspirations of students and future creative workers of these countries are met and developed. Secondly, they explore the role of policy in supporting the agendas of the creative economy, taking also into consideration the potential historical dimension of policy interventions and the impact of a lack of policy frameworks. The book concludes by reflecting on how these two pillars of creative economy development, which are usually taken for granted in studying creative economies in the global north, need to be understood with their own specificity in the context of our selected case studies in Africa. This book will be of interest to students, scholars, and professionals researching the creative economies in Africa across the humanities and social sciences. All the royalties from the publication of this book will be donated to the not-for-profit organisation The Craft and Design Institute (CDI) <https://www.thecdi.org.za> in South Africa, supporting capacity building for young creative practitioners from disadvantaged backgrounds.
