Education 2.0 Leonard J. Waks, 2015-11-17 Thirty years of spirited school reforms have failed to improve our schools and instead have left our public school systems in disarray Meanwhile employment prospects for high school and college graduates are fading and the public is losing faith in its schools The education paradigm inherited from the Industrial Era is in crisis In the last decade however

the Internet and new Web 2.0 technologies have placed the entirety of human knowledge in the hands of everyone. What will our educational institutions make of this unprecedented flood of Web-based learning resources? How can schools be transformed to accommodate the new possibilities for personal and social learning? Leonard Waks gathers all the pieces of our current educational puzzle together in this groundbreaking book. Drawing on new organizational models grounded in complexity theory, Waks maps out an inspiring new paradigm for education in the Internet age and connects all the dots in constructing detailed models for new schools now transformed into open learning centers. Finally, Waks details action steps readers can take to speed this transformative process along in their own locations.

The Googlization of Everything Siva Vaidhyanathan, 2012-03-13 In the beginning the World Wide Web was exciting and open to the point of anarchy, a vast and intimidating repository of unindexed confusion. Into this creative chaos came Google with its dazzling mission: To organize the world's information and make it universally accessible, and its much-quoted motto: Don't be evil. In this provocative book, Siva Vaidhyanathan examines the ways we have used and embraced Google and the growing resistance to its expansion across the globe. He exposes the dark side of our Google fantasies, raising red flags about issues of intellectual property and the much-touted Google Book Search. He assesses Google's global impact, particularly in China, and explains the insidious effect of Googlization on the way we think. Finally, Vaidhyanathan proposes the construction of an Internet ecosystem designed to benefit the whole world and keep one brilliant and powerful company from falling into the evil it pledged to avoid.

Dangerous Church John Bishop, 2011-04-19 Dangerous churches should be norm. Church leaders and church people alike shrink back from danger because we want safety. Jesus said that he's overcome the world and its troubles. Dangerous churches put everything on the line for the one thing that matters most: reaching lost people. It's dangerous not to be a dangerous church. The book is less about methods or even the message of God but about a church that risks everything it has to reach lost people. Living Hope

was birthed 8 years ago and has grown from five families to 5000 attendees grown from one to 19 services on many campuses and baptized 5 000 people along the way A dangerous church sees what only God can do when it acts upon what the church is supposed to be It risks everything to reach people God wants us to live on the edge of our margin when it comes to mission and methods So much of Living Hope s journey has been going back to the Book of Acts and trying to live authentically with the givens of who they were where they were and what they had to work with They learned to abandon agendas and short sighted human plans especially ones that copy what other churches are doing That s when they found God s blessing We went from being a good church to being God honoring church he reports Drawing insight from the book of Acts this book unfolds the very personal journey of a pastor and then his entire church when they finally began to live a dangerous faith The transition had a dramatic impact on the pastor s life and marriage as well as on the congregation and its outreach It opened a new sense of mission and incredible spiritual fruitfulness The pastor is not only a radically different person today but the entire church has become an atmosphere that values taking dangerous steps of faith It will lead Christ s followers to become risk takers who change the world through a revolution that begins with a dangerous grace The book is story rich with examples of the grace filled culture from Living Hope Church through the experiences of its pastor John Bishop It will avoid a smug attitude that implies we ve arrived we re the first to live out grace or we re the best at giving grace Instead the book will convey a humble attitude of we ve got a lot to learn including examples of mistakes the church has made along the way The rapid transition of Living Hope will not be projected as a speed for other churches to follow lest the book invite a crash and burn outcome at other churches Thus the book will find its primary story in and from Living Hope In 2007 Outreach Magazine ranked Living Hope as the seventh fastest growing schurh in the US They have also been listed among the 50 most influential churches in America

Informing the News Thomas E. Patterson,2013-10-08 As the journalist Walter Lippmann noted nearly a century ago democracy falters if there is no steady supply of trustworthy and relevant news Today s journalists are not providing it Too often reporters give equal weight to facts and biased opinion stir up small controversies and substitute infotainment for real news Even when they get the facts rights they often misjudge the context in which they belong Information is the lifeblood of a healthy democracy Public opinion and debate suffer when citizens are misinformed about current affairs as is increasingly the case Though the failures of today s communication system cannot be blamed solely on the news media they are part of the problem and the best hope for something better Patterson proposes knowledge based journalism as a corrective Unless journalists are more deeply informed about the subjects they cover they will continue to misinterpret them and to be vulnerable to manipulation by their sources In this book derived from a multi year initiative of the Carnegie Corporation and the Knight Foundation Patterson calls for nothing less than a major overhaul of journalism practice and education The book speaks not only to journalists but to all who are concerned about the integrity of the information on which America s democracy depends

To Save Everything, Click Here Evgeny Morozov, 2013-03-05 A New York Times Notable Book of the Year In the very near future smart technologies and big data will allow us to make large scale and sophisticated interventions in politics culture and everyday life Technology will allow us to solve problems in highly original ways and create new incentives to get more people to do the right thing But how will such solutionism affect our society once deeply political moral and irresolvable dilemmas are recast as uncontroversial and easily manageable matters of technological efficiency What if some such problems are simply vices in disguise What if some friction in communication is productive and some hypocrisy in politics necessary The temptation of the digital age is to fix everything from crime to corruption to pollution to obesity by digitally quantifying tracking or gamifying behavior But when we change the motivations for our moral ethical and civic behavior we may also change the very nature of that behavior Technology Evgeny Morozov proposes can be a force for improvement but only if we keep solutionism in check and learn to appreciate the imperfections of liberal democracy Some of those imperfections are not accidental but by design Arguing that we badly need a new post Internet way to debate the moral consequences of digital technologies To Save Everything Click Here warns against a world of seamless efficiency where everyone is forced to wear Silicon Valley's digital straitjacket

Are Libraries Obsolete? Mark Y. Herring, 2014-01-23 The digital age has transformed information access in ways that few ever dreamed But the afterclap of our digital wonders has left libraries

reeling as they are no longer the chief contender in information delivery The author gives both sides the web aficionados some of them unhinged and the traditional librarians some blinkered a fair hearing but misconceptions abound Internet be all and end all enthusiasts are no more useful than librarians who urge fellow professionals to be all things to all people The American Library Association wildly democratic at its best and worst appears schizophrenic on the issue unhelpfully My effort here says the author is to talk about the elephant in the room Are libraries obsolete No concludes the author also The book explores how libraries and librarians must and certainly can continue to be relevant vibrant and enduring

Rethinking Thinking Martin Cohen, 2022-04-04 How do generals and business strategists outwit their opponents Where do designers and artists get their inspiration from How can all of us pump up the originality and steer our thinking off the standard well worn tracks Everyone as the French philosopher Ren Descartes pointed out long ago thinks That s the easy bit The harder part and what this book is really about is how to make your thinking original and effective And here the problem is that too often we don t really engage the gears of our brain don t really look at issues in an original or active way we just respond Like computers inputs are processed according to established rules and outputs are thus largely predetermined Yet that s not what makes us human and that s not where the big prizes in life are to be found In the third millennium we need to think a bit more not less And so the focus in this book is on practical suggestions about ways to think better on thinking strategies that each have their own style applications and benefits
