Wire Wrap Jewelry Making Susan Lucas, 2021-01-26 Wire wrapping can be said to be one of the oldest, if not the oldest, technique for creating handmade jewelry. Wire wrapping can simply be defined as taking wire and folding it over itself or beads as well as different mechanisms to produce gems or jewelries. It is carried out using jewelry wires and findings. These findings are very similar to wire. For instance, head pins are used to create different components. These wire components are then connected together by making use of mechanical means without heating or soldering the wire. This method often involves taking a wire and then bending it to form a loop or several other decorative shapes, and that you thereafter wrap the wire around itself to complete the making of the wire component. This is what makes the decorative shape or loop you created to last long. In this book, I have put together everything you need to learn how to make wire wrap jewelry. The tools, materials, skills, and techniques needed. After going through this guide, you will be able to create awesome wire-wrapped jewelries like pendants, rings, earrings, and necklaces, and much more without any difficulty. It is a step-by-step guide that has been broken down so the beginner, intermediate, and experienced person can immensely benefit from it. **GET YOUR COPY TODAY BY CLICKING THE BUY NOW BUTTON AND BECOME A MAESTRO IN MAKING WIRE WRAP JEWELRY**.
