Mastering Go Network Automation Ian Taylor, 2023-03-13

Mastering Go Network Administration is a structured beginning for network administrators looking to improve network efficiency scalability and security This book provides a one stop solution for all of your network administration needs with comprehensive coverage of automation security containerization monitoring and performance testing Beginning with the fundamentals of creating a network automation lab with the EVE NG network simulator and the Go programming language readers will learn the step by step process of installing EVE NG followed by the importance of service mesh in automation and how it can simplify network operations The book delves deeply into critical topics such as deploying ingress controllers and implementing service mesh with Linkerd Readers will learn about container native storage container storage management with Docker and automated SSL certificates firewall configuration and network policies Monitoring and performance tuning are also covered in the book including how to monitor container performance and automatically roll out updates The book covers a series of performance testing strategies like load testing stress testing and scalability testing It shows readers how to find performance bottlenecks and optimise their network with the help of tools like Vegeta and Apache JMeter through the use of real world examples

Key Learnings

- Setting up an EVE NG network simulator
- VIM IDE kubeadm and a comprehensive network automation lab to improve network efficiency scalability and security
- Configuring ports hosts and servers using Go scripting to streamline network automation
- Writing testing and validating network automation scripts to ensure smooth and reliable network administration
- Building Docker images running containers and managing container deployments for efficient containerization
- Automating load balancing firewall configuration and Kubernetes network policies for seamless network management
- Working with popular tools such as Puppet Zookeeper Traefik Envoy and various Go networking packages
- Automating SSL setup container storage container performance monitoring and rolling updates
- Using powerful load testing tools like Vegeta and Apache JMeter for efficient load testing stress testing and scalability testing to identify and eliminate performance bottlenecks

Table of Content

- Go Essentials for Networks
- Setting Up Network Automation Environment
- Configuring Modern Networks
- Write Test and Validate Automation Scripts
- Automation of Configuration Management
- Networking with Container and Docker
- Orchestrating Containers and Automating Workloads
- Automate SSL
- Container native Storage and Performance
- Kubernetes Automation
- Service Mesh
- Firewall and Network Policies
- Network Performance Testing

Audience If you re a network administrator who wants to level up your game Mastering Go Network Administration is the book for you This book will help you become a more efficient effective and confident network administrator by providing clear explanations practical examples and comprehensive coverage
