

Straight Stitches

• Straight Stitch

NOTE: Best sewing results are obtained with the straight stitch foot, but the zigzag foot will also provide acceptable results.

Before sewing with the straight stitch foot, always set the stitch width control to 0 to avoid breaking the needle.

1. Raise the presser foot.
2. Raise the needle to its highest position.
3. Place the edge of the fabric next to a stitching guide line on the needle plate ($5/8"$ is most common).
4. Draw the threads toward the back and lower the presser foot.
5. Press the foot control.
6. Hold the fabric loosely and gently guide it along the guide line, so that it feeds naturally.

Do not force the fabric or try to pull it tight.

7. At the beginning and end of seam, you may want to reverse to lock the stitch.
8. Raise the presser foot and remove the fabric.
9. Cut the threads.

• Use the Seam Guides

The seam guides on the needle plate are engraved to help you measure seam width. The lines are $1/8"$ apart, with the $5/8"$ and $7/8"$ lines marked.

• Turn a Square Corner

To turn a square corner $5/8"$ from the fabric edge:

1. Stop stitching and lower the needle by turning hand wheel toward you when the fabric edge facing you lines up with the cornering guide, as shown.
2. Raise the presser foot and turn the fabric to line the edge with the $5/8"$ seam guide.
3. Lower the presser foot and begin stitching in the new direction.
