

C. PROGRAM THE TIMER

FIG. 2

When the transformer is plugged in, the model code HF32, and a test number (example: A2.4) show in the face plate display for 4 seconds. Then, 12:00 AM and *PRESENT TIME* begin to flash.

**Notes:**

If HF - - shows in the display, press the UP \wedge or DOWN \vee button until HF32 shows. Then, press the SELECT 1 button to set, and change to the flashing *PRESENT TIME* display.

To check the model code, unplug the transformer at the wall outlet and plug in again. If other than HF32 shows, see page S-3 to reset.

SOUND "BEEPER": A "beeper" sounds while pressing buttons for timer set-up. One beep signals a change in the face plate display. Repeated beeps mean the timer will not accept a change from the

button you have pressed, telling you to use another button. For example, while setting the hardness (step 2), the beeper sounds repeatedly when the display reaches 1 using the DOWN button, or the highest hardness setting using the UP button.

1. SET PRESENT TIME OF DAY

If the words *PRESENT TIME* do not show in the display, press the SELECT 1 button (FIG. 2) until they do, or see the previous notes.

■ Press the UP / DOWN buttons to set the present time. Press UP to move the display ahead; press DOWN to move the time backward.

If the present time is between noon and midnight, be sure PM shows.

If the present time is between midnight and noon, be sure AM shows.

Each press of the UP /DOWN buttons changes the time by 1 minute. Holding the buttons in changes the time rapidly.
