

Fallingwater

Frank Lloyd Wright, 1935-1937

Fort Pitt, Pennsylvania, USA, 1935-37

Frank Lloyd Wright designed Fallingwater as the most daring domestic residence in American architectural history. He began the project in 1935, at a time when the architectural establishment was still largely dominated by the traditional styles of the early 20th century. Wright's design was a radical departure from the norm, as it integrated the house with the natural environment of the site. The house was built on a series of concrete terraces that extended over the edge of a waterfall, creating a unique and dramatic architectural form. Wright's design was a bold statement of his architectural philosophy, which emphasized the integration of architecture with nature.
