pilot or you would like to know what it takes this book reflects the experiences thoughts and findings of a trainee pilot
throughout the journey that took him into the right hand seat of a jet airliner The book covers everything that you need to
consider before and during the training process including where to train and how to raise funds The flying course structure
and ground school subjects are detailed and many sample exam questions are included to give a flavour of what lies ahead
The book also looks behind the scenes at life on a training campus and considers all the important practicalities before going
on to look at how to find that dream job *Flying Magazine* ,1978-09 **EASA Enroute Instrument Rating** Phil
Croucher,2014-09-24 Until recently the only option for instrument rating training in Europe was a full course requiring up to
200 hours of theoretical knowledge instruction but the Enroute and Competency Based Instrument ratings for aeroplanes
only are a part of a new approach that is supposed to make instrument flying more accessible because the original courses
were designed as part of a commercial course and were necessarily intense This book is for people who already hold an ICAO
IR and who can simply convert to the EASA version by completing the skill test and demonstrating to the examiner during the
skill test an adequate knowledge of air law meteorology and flight planning It contains all the information needed to answer
the examiner s questions plus tip and tricks not usually taught on such a basic course **AIR CRASH INVESTIGATIONS:

Gimhae Airport Busan Of the 166 persons on board 37 persons survived the crash while 129 occupants were killed The
Korean Aviation Accident Investigation Board KAAIB determined that the probable cause of the crash was pilot error due to
poor crew resource management and lost situational awareness during the circling approach of the runway The Chinese
investigation team pointed out that the Korean ATC was not fully licensed and mistakenly directed the airliner to descend to
a wrong altitude and that the airport did not inform the crew of the weather conditions at the time A contributing factor was
that the airline made all announcements in Chinese and English while most passengers were Korean **Flying Magazine**
