Jordan, 2004-02-04 Recently many SLA researchers have adopted a postmodernist approach which challenges the assumption that SLA research is a rationalist scientific endeavour The resulting epistemological arguments plus problems of theory proliferation contradicting theories and theory domain hinder progress towards a unified theory of SLA Theory Construction in SLA addresses these problems by returning to first principles it asks whether there is such a thing as reliable knowledge what is special about scientific method and how we can best explain SLA It is the first book to use the philosophy of science in order to examine the epistemological underpinnings of SLA research and evaluate rival theories of SLA Part One explores the central issues in the philosophy of science defends rationality against relativists and offers Guidelines for theory assessment Part Two examines different theories of SLA and evaluates them in terms of how well they stand up to the Guidelines     *Second Language Acquisition* Alessandro G. Benati, Tanja Angelovska, 2016-02-25 This book is written in order

to help undergraduate students and trainee teachers to reflect on certain topics and key issues related to second language acquisition. Despite the proliferation of books and introductory courses in second language acquisition, most of these books very often provide a very complex account of theoretical views in second language acquisition and sometimes fail to emphasise the crucial interplay between how people learn languages and what is the most effective way to teach languages. The overall purpose of this book is to provide an overview of second language acquisition research and theories by identifying the main key issues in this field and by highlighting the relevance of this research for classroom implications. The study of second language acquisition is a rich and varied enterprise carried out by researchers whose interests and training often lie in broader disciplines of linguistics, psychology, sociology and education. Readers will be encouraged to critically reflect on the presented content through self-engaging thinking activities in the form of questions, matching activities, choices and conclusions about the implications of SLA theories to the real world applications.
