Edmund Phelps, Raicho Bojilov, Hian Teck Hoon, Gylfi Zoega, 2020-05-05 Nobel Laureate Edmund Phelps and an international group of economists argue that economic health depends on the widespread presence of certain values in particular individualism and self expression Nobel Laureate Edmund Phelps has long argued that the high level of innovation in the lead nations of the West was never a result of scientific discoveries plus entrepreneurship as Schumpeter thought Rather modern values particularly the individualism vitalism and self expression prevailing among the people fueled the dynamism needed for widespread indigenous innovation Yet finding links between nations values and their dynamism was a daunting task Now in Dynamism Phelps and a trio of coauthors take it on Phelps Raicho Bojilov Hian Teck Hoon and Gylfi Zoega find evidence that differences in nations values matter and quite a lot It is no accident that the most innovative countries in the West were rich in values fueling dynamism Nor is it an accident that economic dynamism in the United States Britain and France has suffered as state centered and communitarian values have moved to the fore The authors lay out their argument in three parts In the first two they extract from productivity data time series on indigenous innovation then test the thesis on the link between values and innovation to find which values are positively and which are negatively linked In the third part they consider the effects of robots on innovation and wages arguing that even though many workers may be replaced rather than helped by robots the long term effects may be better than we have feared Itself a significant display of creativity and innovation Dynamism will stand as a key statement of the cultural preconditions for a healthy society and rewarding work

Age of Discovery Ian Goldin, Chris Kutarna, 2024-03-26 A study of how to address our contemporary renaissance by examining similarities with the original Renaissance The present is a contest between the bright and dark sides of discovery To avoid being torn apart by its stresses we need to recognize the fact and gain courage and wisdom from the past Age of Discovery shows how Now is the best moment in history to be alive but we have never felt more anxious or divided Human health aggregate wealth and education are flourishing Scientific discovery is racing forward But the same global flows of trade capital people and ideas that make gains possible for some people deliver big losses to others and make us all more vulnerable to one another Business and science are working giant revolutions upon our societies but our politics and institutions evolve at a much slower pace That's why in a moment when everyone ought to be celebrating giant global gains many of us are righteously angry at being left out and stressed about where we're headed To make sense of present shocks we need to step back and recognize we've been here before The first Renaissance the time of Columbus Copernicus Gutenberg and others likewise redrew all maps of the world democratized communication and sparked a flourishing of creative achievement But their world also grappled with the same dark side of rapid change social division political extremism insecurity pandemics and other unintended consequences of discovery Now is the second Renaissance We can still flourish if we learn from the first Praise for Age of Discovery A bold mega analysis of global education health prosperity and technology incisive and rich in context and granularity Nature Essential reading to navigate the waves of innovation we

face today Garry Kasparov 13th World Chess Champion and Chairman of the Human Rights Foundation The Inequality Trap William Watson, 2015-09-15 US President Barack Obama has called economic inequality the defining issue of our time It has inspired the Occupy movements made a French economist into a global celebrity and given us a new expression the one percent But is our preoccupation with inequality really justified Or wise In his new book William Watson argues that focusing on inequality is both an error and a trap It is an error because much inequality is good the reward for thrift industry and invention It is a trap because it leads us to fixate on the top end of the income distribution rather than on those at the bottom who need help most In fact if we respond to growing inequality by fighting capitalism rather than poverty we may end up both poorer and less equal Explaining the complexities of modern economics in a clear accessible style The Inequality Trap is the must read rejoinder to the idea that fighting inequality should be our top policy priority **AI Development and the 'Fuzzy Logic' of Chinese Cyber Security and Data Laws** Max Parasol, 2021-12-16 Explains the rapid rise of China's innovation system and provides a roadmap for the prospects of China's AI development **The State of Black Progress** Star Parker, 2024-03-19 Black Americans have arguably arrived at the height of their cultural prominence In politics entertainment academia and nearly every sphere of influence black issues dominate the national discussion Yet many black Americans are suffering more than ever from the blight of poverty physical and mental health struggles lack of opportunity and failing schools How do these signs of success on the surface coexist with social stagnation on the ground in the black community This edited volume sponsored by the Center for Urban Renewal and Education and featuring contributions from W B Allen Judge Janice Rogers Brown ret Ian Rowe Sally Pipes Stephen Moore and others addresses this question in light of American values and the history of constitutional jurisprudence In the 1860s black America was promised emancipation but continued to experience subjugation In the 1960s black America was promised equality but was frequently exploited Racial discrimination played a role but in the intervening decades misguided progressive policies and the normalization of victimhood rhetoric has proven even more disastrous By failing to live up to American ideals our nation denied many black Americans their chance at the American Dream The scholars and luminaries who contributed to this volume believe that what has been lost can be recovered If our nation recognizes the history of our current predicament embraces the founding principles that made America an economic powerhouse and commits to an agenda of empowering fiscal educational and faith and family affirming policies then black Americans can overcome the obstacles that most hamper progress in their communities *Nuova età dell'oro* Ian Goldin, Chris Kutarna, 2018-02-22 Dei quindici anni pi caldi mai avvertiti sul nostro pianeta quattordici si sono registrati nel xxi secolo L inquinamento da carbonio ha portato i gas serra ai picchi pi alti dalla fine del Cretaceo Una crisi finanziaria globale ha lasciato senza parole i cervelli meglio pagati al mondo E ancora l 11 settembre gli attacchi terroristici da Montreal a Manchester la Brexit i collassi nucleari gli tsunami e gli uragani di ragioni per pensare che tutto stia crollando ce ne sono parecchie Eppure Ian Goldin e Chris Kutarna sono sicuri questa la Nuova et

dell'oro Proprio come nel Rinascimento nella nostra epoca c'è un terreno estremamente fertile per la fioritura del genio perché in nessun altro momento storico il rapporto tra scienza e tecnologia è stato così stretto. Vincere le sfide del presente e superare lo shock continuo prodotto dalla collisione tra realtà e aspettative significa allora strutturare una strategia che presupponendo il fattore rischio come elemento imprescindibile della natura del genio attinga al passato per dirigere il presente e orientare il futuro. Goldin e Kutarna ripercorrono quindi la storia delle scoperte geografiche, delle rivoluzioni scientifiche e artistiche che hanno caratterizzato l'età moderna e le confrontano con l'attualità come Gutenberg e la stampa, Zuckerberg e i social media, contribuiscono a diffondere la conoscenza, il crollo del muro di Berlino e la globalizzazione hanno abbattuto barriere e consentito di varcare confini prima invalicabili in misura pari alla scoperta di Cristoforo Colombo, i flussi migratori di oggi spesso determinati da movimenti geopolitici radicati nella religione ricordano quelli provocati in Europa dalla scissione tra Chiesa cattolica e Chiesa riformata. Se vero che il presente non è una ripetizione di quanto già accaduto, pur vero che l'umanità non si reinventa a ogni generazione e che a dirla con Machiavelli per prevedere il futuro bisogna consultare il passato. Nuova è dell'oro lo strumento necessario per conquistare una visuale più ampia, calibrare speranza e determinazione, promuovere un progresso finalmente sostenibile. Perché tempo che economia e cultura entrino in un secondo Rinascimento.
