expected from migration to SOA the lack of SOA know how is identified as a main reason As the survey reveals 45 percent of the interviewed enterprises have nearly no knowledge or no knowledge about SOA at all Another 38 percent have only basic knowledge The lack of knowledge is confirmed by a survey from the research company Quocirca which found out based on a sample size of 1500 that 30 percent of respondents have absolutely no knowledge about SOA and 25 percent have only minimal knowledge Similar results are found among enterprises using SAP software The results of an online survey conducted by the German speaking SAP User Group DSAG shows that 64 percent of 344 enterprises are just a little or not at all familiar with enterprise SOA and only every fifth enterprise has developed a platform strategy Furthermore enterprise SOA is still a topic of the IT department although it would be
