Smoot,Smoot,Richard G. Smith,Jack Price,1998 Mastering Megatrends Doris Naisbitt,John Naisbitt,2019-10-14 From the authors of The New York Times bestseller Megatrends Ten New Directions Transforming Our Lives comes Mastering Megatrends Understanding and Leveraging the Evolving New World which deals with the complexity of change It is one thing to spot a real trend from a fad but it is quite another thing to deal with an incoming trend In today s digital world almost everyone can easily access information But this information can be either fact or opinion informative or intentional intellectual or populist spread by humans or algorithms Once spread it is consumed by readers who may be open or biased and have culturally and geographically diverse attitudes Since we naturally tend to ignore information that jeopardizes our own expectations Mastering Megatrends offers guidelines on how to take down internal and external barriers of understanding as it covers such topics as HOW TO MAKE JUDGMENTS AND MASTER EMOTIONS UNDERSTANDING THE EMERGING PLAYERS A NEW MAPPING OF THE WORLD MASTERING A NEW WORKING WORLD MASTERING THE EDUCATION CHALLENGE MASTERING MASS COMMUNICATIONS MASTERING A NEW TRADE ORDER **Tutorial Distance Learning** Alfred Bork,Sigrun Gunnarsdottir,2012-12-06 Learning is a critical worldwide problem for humans essential to create a peaceful and happy world We have serious problems in learning in both wealthy and poor areas New approaches to learning are needed as the current system may not rise to the new challenges This book proposes a new strategy for learning worldwide and for all ages of students Computer based distance learning would be the major delivery mechanism with very large numbers of students The very frequent interactions between the student and the computer would be like that with a skilled human teacher These interactions would take place in the student s native language in both directions A typical interaction would be a question to a student and a free form student response Both voice and keyboard student input would be possible The learning programs would work with each student until mastery is achieved adapting to the needs of each Students would be active learners The book begins with the problems and goals of learning It considers

possible forms of distance learning looking at the variables involved current examples of distance learning and possible future forms including examples from science fiction It then investigates student interactions considering both frequency of interactions and the quality of each interaction Programs developed in the Educational Technology Center at the University of California Irvine illustrate the critical idea of tutorial learning with computers Production of tutorial learning material and costs for a student hour of learning is discussed The book ends with suggestions for future progress Current hardware and software is fully adequate for the tasks described Development of all required learning units is a major activity After this development both better quality of learning and lower costs are very likely Further experimental work is essential to understand the possibilities
