

An aerial, top-down view of a light-colored wooden floor. The floor is covered with a grid of square indentations, each containing a dark, rectangular object, possibly a piece of wood or a tile. The perspective is from directly above, looking down at the floor. The text "LOS CARPINTEROS HANDWORK — CONSTRUCTING THE WORLD" is centered on the floor, overlaid on the grid pattern.

Los Carpinteros Handwork Constructing The World:

Los Carpinteros Paulo Herkenhoff, 2010 This monograph presents a comprehensive survey of Los Carpinteros work since 2003 their most critically acclaimed period *The New Politics of the Handmade* Anthea Black, Nicole Burisch, 2020-12-10 Contemporary craft art and design are inseparable from the flows of production and consumption under global capitalism The New Politics of the Handmade features twenty three voices who critically rethink the handmade in this dramatically shifting economy The authors examine craft within the conditions of extreme material and economic disparity a renewed focus on labour and materiality in contemporary art and museums the political dimensions of craftivism neoliberalism and state power efforts toward urban renewal and sustainability the use of digital technologies and craft s connections to race cultural identity and sovereignty in texts that criss cross five continents They claim contemporary craft as a dynamic critical position for understanding the most immediate political and aesthetic issues of our time **Building Materials** Katie Lloyd Thomas, 2021-11-18 At a time of unprecedented levels of change in the production of building materials and their deployment in construction better theoretical and historical tools are needed to understand these new developments and how they are altering the practices and concepts of architecture Building Materials offers a radical rethink of how materials as they are constituted in architectural practice are themselves constructed and in turn uncovers a vast and neglected resource of architectural writing about materials as they are mobilized in architecture The book is unique in conceiving architectural specification as a starting point for architectural theory arguing that how materials are prescribed through a range of practices from the literal processes of procurement and manufacture to epistemological contractual social and economic frameworks radically alters their potential in architecture Drawing on the work of French philosopher Gilbert Simondon as well as close readings of everyday specifications from the 18th to 21st centuries the book reveals that materials do not pre exist their shaping or use in the world but come into being through the processes that constitute them The book addresses three distinct methods of specification each through the lens of a different material naming through timber process based through concrete and performance specification through glass in turn revealing how the process of architectural specification or Preliminary Operations as Simondon puts it allows for the development of specific relationships between material and function *Los Carpinteros*, 2011 **The New Décor** Ralph Rugoff, 2010 PREFACE These fleeting sketches are all republished by kind permission of the Editor of the DAILY NEWS in which paper they appeared They amount to no more than a sort of sporadic diary a diary recording one day in twenty which happened to stick in the fancy the only kind of diary the author has ever been able to keep Even that diary he could only keep by keeping it in public for bread and cheese But trivial as are the topics they are not utterly without a connecting thread of motive As the reader s eye strays with hearty relief from these pages it probably alights on something a bed post or a lamp post a window blind or a wall
