Loss Of Biodiversity Essential Issues:

Loss of Biodiversity David M. Barker, 2011 This title examines one of the world's critical issues human trafficking. Readers will learn the historical background of this issue leading up to its current and future impact on society. Various forms of modern slavery including debt bondage, child labor, prostitutes, sex slaves, and child soldiers are discussed in detail, as well as risk factors for trafficking such as poverty, violence, and cultural, traditional, or religious views. Also covered are the physical, psychological, and spiritual impact trafficking survivors experience, laws intended to combat human trafficking, the tier system, and organizations such as the United Nations and UNICEF. Engaging text, informative sidebars, and color photographs present information realistically, leaving readers with a thorough, honest interpretation of human trafficking. Features include a timeline, facts, additional resources, Web sites, a glossary, a bibliography, and an index. Essential Issues is a series in the Essential Library, an imprint of ABDO Publishing Company. *Halting Biodiversity Loss* Great Britain. Parliament. House of Commons. Environmental Audit Committee, 2008 This is the thirteenth report from the Environmental Audit Committee of the 2007-08 session. HCP 743 ISBN 9780215524843 The Committee states that the Government will fail to meet the 2010 target to halt biodiversity loss, although the target might have been unrealistic. The Committee does see some progress with 80% of Sites of Special Scientific Interest (SSIs) in a favourable condition, with a number of rare species having recovered. In general, though, biodiversity loss continues in the wider countryside, with many species and habitats facing severe declines and local extinctions. The Committee does believe, though, that with leadership and effective policies, biodiversity loss could, in fact, be reversed, and states the Government should adopt a new target to halt the loss. Biodiversity policies need to be cross-departmental, and the Government's ecosystem assessment is a way forward by encouraging such an approach and promoting biodiversity protection at the regional and local scales. The Committee further states that the Government could make a large contribution in preventing biodiversity loss through more support for the UK Overseas Territories. **Does the UN Model Still Work? Challenges and Prospects for the Future of Multilateralism**, 2022-11-28 Composed of original articles from academics and policy notes from practitioners, this book attempts to draw up the state of multilateralism through the UN model and identify potential ways to address its challenges and shortcomings. The contributors question the role of multilateralism, sometimes accused of being fragmented, inefficient, and unrepresentative, and its impact on global governance, democracy, trade, and investment, the environment, and human rights. Since most of the authors are not from the UN system, the content of the contributions provides an external and more neutral assessment of the UN's ability to continue to function today as a serious actor within a global movement in favor of a renewed form of multilateralism. **Does the UN Model Still Work? Challenges and Prospects for the Future of Multilateralism** is now available in paperback for individual customers. **Global change ecology: threats and solutions** Ming-Chih Chiu, Qinghua Cai, Jhih-Rong Liao, Kozo Watanabe, Vincent Resh, 2024-10-22 Global Change Ecology promotes the understanding of how globally important changes
