McDougall's Great Lakes Whalebacks Neel R. Zoss, 2007 During the last years of the 19th century the Duluth Harbor situated between the sister cities of Duluth Minnesota and Superior was the birthplace of a bold and innovative and decidedly odd looking class of Great Lakes barges and steamships known as whalebacks Capt Alexander McDougall and his American Steel Barge Company built the curved decked snout nosed whalebacks on the shores of the harbor first at Duluth's Rice's Point and later in Howard's Pocket at Superior The vessels were a radical departure in design form and construction from the standard shipbuilding concepts of the era but proved themselves more than capable as a number of the boats sailed the Great Lakes and the seaboards of America until the 1960s All the whalebacks are gone now either scrapped or sunk with one exception After sailing the lakes for more than 70 years the last whaleback the SS Meteor returned home to Superior in 1972 and is now continuing its service as a magnificent maritime museum on Barker's Island McDougall's Great Lakes Whalebacks Neel R. Zoss, 2007-08-15 During the last years of the 19th century the Duluth Harbor situated between the sister cities of Duluth Minnesota and Superior was the birthplace of a bold and innovative and decidedly odd looking class of Great Lakes barges and steamships known as whalebacks Capt Alexander McDougall and his American Steel Barge Company built the curved decked snout nosed whalebacks on the shores of the harbor first at Duluths Rices Point and later in Howards Pocket at Superior The vessels were a radical departure in design form and construction from the standard shipbuilding concepts of the era but proved themselves more than capable as a number of the boats sailed the Great Lakes and the seaboards of America until the 1960s All the whalebacks are gone noweither scrapped or sunkwith one exception After sailing the lakes for more than 70 years the last whaleback the SS Meteor returned home to Superior in 1972 and is now continuing its service as a magnificent maritime museum on Barkers Island Whaleback Ships and the American Steel Barge Company C. Roger Pellett, 2018-05-14 A history of the American Steel Barge Company and the vessels that it built and operated The whaleback ship reflected the experiences of its inventor Captain Alexander McDougall who decided in the 1880s that he could build an improved and easily towed barge cheaply by using the relatively unskilled labor force available in his adopted hometown of Duluth Minnesota Captain McDougall's dream resulted in the creation of the American Steel Barge Company From 1888 to 1898 the American Steel Barge Company built and operated a fleet of forty four barges and steamships on the Great Lakes and in international trade These new ships were considered revolutionary by some and nautical curiosities by others Built from what was then a high tech material steel and powered by state of the art steam machinery their creation in the remote north was a sign of industrial accomplishment In Whaleback Ships and the American Steel Barge Company Roger C Pellett explains that the construction of these ships and the industrial infrastructure required to build them was financed by a syndicate that included some of the major players active in the Golden Age of American capitalism The American Steel Barge Company operated profitably from 1889 through 1892 each year adding new vessels to

its growing fleet By 1893 it had run out of cash The cash crisis worsened with the onset of the Panic of 1893 which plunged the country into a depression that mostly halted the ship building industry Only one shareholder John D Rockefeller was willing and able to invest in the company to keep it afloat and by doing so he gained control When prosperity returned in 1896 the interest in huge iron ore deposits on the Mesabe Range required larger more efficient vessels In an attempt to meet this need the company built another vessel that incorporated many whaleback features but included a conventional Great Lakes steamship bow Although this new steamship compared favorably with vessels of conventional design it was the last vessel of whaleback design to be built Whaleback Ships and the American Steel Barge Company objectively examines the design of these ships using the original design drawings notes the successes and failures of the company s business strategy and highlights the men at the operating level that attempted to make this strategy work Readers interested in the maritime history of the Great Lakes and the industries that developed around them will find this book fascinating Steamboat Bill Great Lakes Marine Painting of the Nineteenth Century J.
