Imagining AI Stephen Cave, Kanta Dihal, 2023-05-03 Chapters 16 19 and 21 from this book are published open access and are free to read or download from Oxford Academic AI is now a global phenomenon Yet Hollywood narratives dominate perceptions of AI in the English speaking West and beyond and much of the technology itself is shaped by a disproportionately white male US based elite However different cultures have been imagining intelligent machines since long before we could build them in visions that vary greatly across religious philosophical literary and cinematic traditions This book aims to spotlight these alternative visions *Imagining AI* draws attention to the range and variety of visions of a future with intelligent machines and their potential significance for the research regulation and implementation of AI The book is structured geographically with each chapter presenting insights into how a specific region or culture imagines intelligent machines The contributors leading experts from academia and the arts explore how the encounters between local narratives digital technologies and mainstream Western narratives create new imaginaries and insights in different contexts across the globe The narratives they analyse range from ancient philosophy to contemporary science fiction and visual art to policy discourse The book sheds new light on some of the most important themes in AI ethics from the differences between Chinese and American visions of AI to digital neo colonialism It is an essential work for anyone wishing to understand how different cultural contexts interplay with the most significant technology of our time Anti-ageing Medicine Astrid

Stuckelberger,2008 The 21st century technological development is revolutionizing medicine and health care bringing new hopes to human suffering by offering cures and treatments which were unthinkable a few decades ago This is where anti ageing medicine finds its niche Anti ageing medicine aims at slowing arresting and reversing phenomena associated with ageing by merging biotechnological innovation and engineered solutions Ideally by means of the newest medical technology the body machinery should be kept fit and at peak performance all life long Early detection of age related dysfunction should thus be fixed at any age with interventions such as metabolic fine tuning enhancement regeneration restoration or replacement of body parts i e organs skin bone or muscle It covers a vast array of domains from cell therapy to pharmaceutical interventions from bio surgery to aesthetic surgery from human enhancement to fortified food from smart housing and robots to toxic free environments Anti ageing medicine holds promises but also significant risks and safety issues which are addressed in this book It presents the latest scientific evidence on what works or does not work It also provides public policy recommendations to ensure the protection of consumers and their rights while encouraging research and development This book is intended for academics health professionals business persons consumers and policy makers interested in the latest evidence and ethical issues about anti ageing medicine *Dead or Alive!* Maria Fabricius

Hansen,Gundhild Ravn Borggreen,Rosanna TindbAek,2020-02-18 The image is an ontological paradox it is made of dead matter yet appears to be alive For millennia artists have created images of the living world images that are static and yet possess the power to bring to life a frozen moment in time While this tension has constituted a fundamental challenge for as long as theories on the nature of images have existed recent scholarship has rekindled interest in the question of what images do to us Despite the rational discourse of Modernity we must acknowledge that we view images as half living entities This book addresses the perpetual relevance of images enigmatic life likeness through studies that engage with a variety of visual material by asking the same question what qualifies animation Covering a wide range of image practices such as early paleolithic stone engravings medieval tomb sculpture renaissance death masks and baroque painting to modern fashion park design early cinema and BioArt the twelve chapters written by scholars of art history and visual culture demonstrate that the ontological paradox of the image is not limited to a specific historical period or certain types of images but can be seen throughout the history of images across different cultures How AI Will Shape Our Future Pedro URIA-RECIO,2024-11-20

the social educational and computer sciences As such it will appeal to students teachers researchers and practitioners who intend to conduct robotics training in schools or institutions Rights for Robots Joshua C. Gellers,2020-10-26 Bringing a unique perspective to the burgeoning ethical and legal issues surrounding the presence of artificial intelligence in our daily lives the book uses theory and practice on animal rights and the rights of nature to assess the status of robots Through extensive philosophical and legal analyses the book explores how rights can be applied to nonhuman entities This task is completed by developing a framework useful for determining the kinds of personhood for which a nonhuman entity might be eligible and a critical environmental ethic that extends moral and legal consideration to nonhumans The framework and ethic are then applied to two hypothetical situations involving real world technology animal like robot companions and humanoid sex robots Additionally the book approaches the subject from multiple perspectives providing a comparative study of legal cases on animal rights and the rights of nature from around the world and insights from structured interviews with leading experts in the field of robotics Ending with a call to rethink the concept of rights in the Anthropocene suggestions for further research are made An essential read for scholars and students interested in robot animal and environmental law as well as those interested in technology more generally the book is a ground breaking study of an increasingly relevant topic as robots become ubiquitous in modern society The Open Access version of this book available at <http://www.taylorfrancis.com/books/9780429288159> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Historical Dictionary of Japanese Business Stuart D.B. Picken,2016-12-19 Japan although now listed as the world's third largest economy after that of the United States and China has been too readily dismissed in the late 20th century as a spent force This is as unfortunate as it is incorrect for a number of reasons First while the Peoples Republic of China is indeed growing and its markets are expanding an enormous amount of the impetus for development as well as logistical support is coming from large numbers of Japanese corporations operating in the PRC Major Japanese enterprises such as Toyota Sony and Honda are already in China or are in the process of establishing a presence there The export of Japanese technology remains an important contribution to China's development The benchmark of product quality within Asia and in some areas beyond has been set by Japanese industrial standards This second edition of Historical Dictionary of Japanese Business contains a chronology an introduction appendixes and an extensive bibliography The dictionary section has over 800 cross referenced entries on important personalities Japanese businesses politics and economy This book is an excellent access point for students researchers and anyone wanting to know more about Japanese Business **Robots in American**

Apocalyptic AI: Visions of Heaven in Robotics, Artificial Intelligence, and Virtual Reality Robert M. Geraci, 2010-02-05 Apocalyptic AI the hope that we might one day upload our minds into machines or cyberspace and live forever is a surprisingly wide spread and influential idea affecting everything from the world view of online gamers to government research funding and philosophical thought In Apocalyptic AI Robert Geraci offers the first serious account of this cyber theology and the people who promote it Drawing on interviews with roboticists and AI researchers and with devotees of the online game Second Life among others Geraci illuminates the ideas of such advocates of Apocalyptic AI as Hans Moravec and Ray Kurzweil He reveals that the rhetoric of Apocalyptic AI is strikingly similar to that of the apocalyptic traditions of Judaism and Christianity In both systems the believer is trapped in a dualistic universe and expects a resolution in which he or she will be translated to a transcendent new world and live forever in a glorified new body Equally important Geraci shows how this worldview shapes our culture Apocalyptic AI has become a powerful force in modern culture In this superb volume he shines a light on this belief system revealing what it is and how it is changing society
