DeVries, 2013-09-05 A History of Ecology and Environmentalism in Spanish American Literature undertakes a comprehensive ecocritical examination of the region s literature from the foundational texts of the nineteenth century to the most recent fiction The book begins with a consideration of the way in which Argentine Domingo Faustino Sarmiento s views of nature through the lens of the categories of civilization and barbarity from Facundo 1845 are systematically challenged and revised in the rest of the century Subsequently this book develops the argument that a vital part of the cultural critique and aesthetic innovations of Spanish American modernismo involve an ecological challenge to deepening discourses of untamed development from Europe and the United States In other chapters many of the well established titles of regional and indigenista literature are contrasted to counter traditions within those genres that express aspects of environmental justice deep ecology the relational role of emotion in nature protectionism and conservationism even the rights of non human nature Finally the concluding chapters find that the articulation of ecological advocacy in recent fiction is both more explicit than what came before but also impacts the formal elements of literature in unique ways Textual conventions such as language imagery focalization narrative sequence metafiction satire and parody represent innovations of form that proceed directly from the ethical advocacy of environmentalism The book concludes with comments about what must follow as a result of the analysis including the revision of canon the development of literary criticism from novel approaches such as critical animal studies and the advent of a critical dialogue within the bounds of Spanish American environmentalist literature A History of Ecology and Environmentalism in Spanish American Literature attempts to develop a sense of the way in which ecological

ideas have developed over time in the literature particularly the way in which many Spanish American texts anticipate several of the ecological discourses that have recently become so central to global culture current environmentalist thought and the future of humankind

California In Path of Empire Aims McGuinness presents a novel understanding of the intertwined histories of the California Gold Rush the course of U S empire and anti imperialist politics in Latin America Between 1848 and 1856 Panama saw the building by a U S company of the first transcontinental railroad in world history the final abolition of slavery the establishment of universal manhood suffrage the foundation of an autonomous Panamanian state and the first of what would become a long list of military interventions by the United States Using documents found in Panamanian Colombian and U S archives McGuinness reveals how U S imperial projects in Panama were integral to developments in California and the larger process of U S continental expansion Path of Empire offers a model for the new transnational history by unbinding the gold rush from the confines of U S history as traditionally told and narrating that event as the history of Panama a small place of global importance in the mid 1800s
