

Fifth Grade Pacing Guide Weeks 1-9

Week	Unit and Topic	Days Completed
Operations and Algebraic Thinking Write and interpret numerical expressions		
1	Use parentheses, brackets, or braces in numerical expressions, and evaluate expressions with these symbols	
2	Write simple expressions that represent relationships with numbers and interpret numerical expressions without evaluating them. For example, express the calculation "add 8 and 7, then multiply by 2" as $2 \times (8 + 7)$. Recognize that $3 \times (2 + 7)$ is the same as $3 \times 2 + 3 \times 7$ without having to calculate the values of each side.	
Operations and Algebraic Thinking Analyze patterns and relationships		
3	Generate two numerical patterns using two given rules. Identify apparent relationships between corresponding terms. Form ordered pairs to represent the relationship between the two patterns, and graph the ordered pairs on a coordinate plane. For example, given the rules "add 3" and "multiply by 5," the ordered pairs $(1, 5), (2, 10), (3, 15), \dots$ are generated.	
Number and Operations in Base Ten Understand the place value system		
4-5	Recognize that in a multi-digit number, a digit in one place represents 10 times as much as it represents in the place to its right and 1/10 of what it represents in the place to its left.	
6	Round numbers to the nearest 10, ones of the greatest place value, and round to the nearest 100 and 1,000. Understand that the place value system is based on powers of 10.
