Duff, 2017 When Jesus of Nazareth began proclaiming the kingdom of God early in the first century he likely had no intention of starting a new religion especially one that included former pagans Yet a new religion did eventually develop one that not only included non Jews but was soon dominated by them How did this happen Jesus Followers in the Roman Empire by Paul Duff offers an accessible and informed account of Christian origins beginning with the teaching of Jesus and moving to the end of the first century Duff's narrative shows how the rural Jewish movement led by Jesus developed into a largely non Jewish phenomenon permeating urban centers of the Roman Empire Paying special attention to social cultural and religious contexts as well as to early Christian ideas about idolatry marriage family slavery and ethnicity Jesus Followers in the Roman Empire will help readers cultivate a deeper understanding of the identity beliefs and practices of early Christ believers *Young Shakespeare's Young Hamlet* T. Karoline M. Information-based methods for neuroimaging: analyzing structure, function and dynamics Jesus M. Cortés, Daniele Marinazzo, Miguel Angel Muñoz, 2015-05-07 The aim of this Research Topic is to discuss the state of the art on the use of Information based methods in the analysis of neuroimaging data Information based methods typically built as extensions of the Shannon Entropy are at the basis of model free approaches which being based on probability distributions rather than on specific expectations can account for all possible non linearities present in the data in a model independent fashion Mutual Information like methods can also be applied on interacting dynamical variables described by time series thus addressing the uncertainty reduction or information in one variable by conditioning on another set of variables In the last years different Information based methods have been shown to be flexible and powerful tools to analyze neuroimaging data with a wide range of different methodologies including formulations based on bivariate vs multivariate representations frequency vs time domains etc Apart from methodological issues the information bit as a common unit represents a convenient way to open the road for comparison and integration between different measurements of neuroimaging data in three complementary contexts Structural Connectivity Dynamical Functional and Effective Connectivity and Modelling of brain activity Applications are ubiquitous starting from resting state in healthy subjects to modulations of consciousness and other aspects of pathophysiology Mutual Information based methods have provided new insights about common principles in brain organization showing the existence of an active default network when the brain is at rest It is not clear however how this default network is generated the different modules are intra interacting or disappearing in the presence of stimulation Some of these open questions at the functional level might find their mechanisms on their structural correlates A key question is the link between structure and function and the use of structural priors for the understanding of the functional connectivity measures As effective connectivity is concerned recently a common framework has been proposed for Transfer Entropy and Granger Causality a well established methodology originally based on autoregressive models This framework can open the way to new theories and applications This Research Topic brings together contributions from researchers from different backgrounds which are either developing new approaches or applying existing methodologies to new data and we hope it will set the basis for discussing the

development and validation of new Information based methodologies for the understanding of brain structure function and dynamics Methodology in the Use of the Old Testament in the New David Allen, Steve Smith, 2019-09-19 This volume brings together scholars of both the Old and New Testaments to discuss three areas of methodological interest in respect of the use of the Old Testament in the New OT NT It begins with an interdisciplinary conversation into insights that OT NT scholars might glean from other related disciplines and approaches The subsequent essays consider the notion of an Old Testament text s context and how contemporaneous authors such as Philo or the Qumran community conceived of and attended to the concept The contributors then turn their focus to the criteria that can should be used for determining Old Testament allusions or echoes and the legitimacy for so doing particularly responding to the work of Richard Hays The volume closes with a fresh proposal for OT NT methodology along with a concluding reflection on the collected essays

Gettysburg Religion Steve Longenecker, 2014-01-01 In the borderland between freedom and slavery Gettysburg remains among the most legendary Civil War landmarks A century and a half after the great battle Cemetery Hill the Seminary and its ridge and the Peach Orchard remain powerful memories for their embodiment of the small town North and their ability to touch themes vital to nineteenth century religion During this period three patterns became particularly prominent refinement diversity and war In Gettysburg Religion author Steve Longenecker explores the religious history of antebellum and Civil War era Gettysburg shedding light on the remarkable diversity of American religion and the intricate ways it interacted with the broader culture Longenecker argues that Gettysburg religion revealed much about larger American society and about how trends in the Border North mirrored national developments In many ways Gettysburg and its surrounding Border North religion belonged to the future and signaled a coming pattern for modern America
