

Scissor Lift Safety Tips

1 Receive proper training, including hands-on training. Read the operators manual. Become familiar with the safety signs and location of all safety devices and controls.

2 Be aware of and follow all employer safety rules and work site regulations. Don't forget about local laws and regulations as well.

3 Before operating the equipment perform pre-operation inspection and function tests. Tag, discontinue use, and remove it from service if problems are found.

4 Perform a workplace hazard assessment prior to moving the machine to the area.

5 Only raise the platform on a firm, level surface.

6 Always wear appropriate fall protection and keep them connected to the proper anchor points at all times.

7 Never raise the platform near energized power lines. Refer to operators safety manual for the minimum safe clearance guidelines.

8 Never sit, stand, or climb on the platform guardrails. Maintain a firm footing on the platform floor at all times.

9 Only use the scissor lift outside only when weather conditions are good. Wind speeds should generally be below 28 miles per hour.

10 Never climb down from a raised platform, use a cell phone or two way radio to communicate and have a rescue plan in place.
