Job In Bara Hospital

Job In Bara Hospital:

Chain of Fire Beverley Naidoo, 2004-09-02 Set in South Africa at the height of the apartheid regime when the government started a policy of ethnic cleansing forcibly removing people from their homes and moving them to so called homelands Schoolchildren Naledi and Tiro are caught up in the protests and resistance as they and their grandmother are threatened with removal from their village Protestors are arrested and beaten but still people fight on Freedom lies at the end of a long road

Baragwanath Hospital, Soweto Simonne Horwitz, 2013-09-01 Baragwanath Hospital Soweto illustrates how this rapidly growing underfunded but surprisingly effective institution found the niche that allowed it to exist to provide medical care to a massive patient body and at times even to flourish in the apartheid state The book offers new ways of exploring the history of apartheid apartheid medicine and health care The long history of Chris Hani Baragwanath Hospital its full current name or Bara as it is popularly known has been shaped by a complex set of conditions Established in the early 1940s Bara stands on land purchased by the Cornish immigrant John Albert Baragwanath in the late nineteenth century He set up a refreshment post trading store and hotel on the site in what is now Soweto which was a one day journey by ox wagon from Johannesburg The hotel became affectionately known as Baragwanath Place the surname is Welsh from bara meaning bread and gwenith meaning wheat The land was then bought by Corner House Mining Group and later taken over by Crown Mines Ltd but was never mined The British government bought the land in the early 1940s to build a military hospital but by 1947 Baragwanath ceased to operate as a military hospital and under the auspices of the Transvaal Provincial Administration a civilian hospital was opened with 480 beds Patients were transferred from the non European wing of the Johannesburg General Hospital in the white area of Johannesburg Links were immediately forged with the University of the Witwatersrand and Bara would over time become one of its largest teaching centres This link brought medical students and their teachers into direct contact with apartheid in the medical sphere This book will contribute to studies of the history of apartheid that have begun to provide a more nuanced account of its workings The history of Baragwanath and of the doctors and nurses who worked there tells us much about apartheid ideology and practice as well as resistance to it in the realm of health care

In the Mind Fields Casey Schwartz, 2016-07-26 Neuroscience and psychoanalysis are historically opposed responses to the age old quest to understand ourselves one focused on the brain and the other on the mind As part of a pioneering program to look for common ground between the two warring disciplines Casey Schwartz spent one year immersed in psychoanalytic theory at the Anna Freud Centre and the next year studying the brain among Yale's cutting edge neuroscientists She came away with a clear picture of the distance between the two fields while neuroscience is lacking in attention to lived experience psychoanalysis is often too ephemeral and subjective Armed with this awareness Schwartz set out to study the main pioneers in the emerging and controversial field of neuropsychanalysis With passion and humor she makes a trenchant argument for a hybrid scientific culture that will allow the two approaches to thrive together The New

African Diaspora in Vancouver Gillian Creese, 2011-08-13 The New African Diaspora in Vancouver documents the experiences of immigrants from countries in sub Saharan Africa on Canada's west coast. Despite their individual national origins many adopt new identities as African and are actively engaged in creating a new place based African community. In this study Gillian Creese analyzes interviews with sixty one women and men from twenty one African countries to document the gendered and racialized processes of community building that occur in the contexts of marginalization and exclusion as they exist in Vancouver. Creese reveals that the routine discounting of previous education by potential employers, the demeaning of African accents and bodies by society at large, cultural pressures to reshape gender relations and parenting practices and the absence of extended families often contribute to downward mobility for immigrants. The New African Diaspora in Vancouver maps out how African immigrants negotiate these multiple dimensions of local exclusion while at the same time creating new spaces of belonging and emerging collective identity. *South African Labour Bulletin*, 2004 *Job Stressors And Mental Health: A Proactive Clinical Perspective* Karen Belkic, Cedo Savic, 2013-08-28 The title of this book reflects the fundamental aim to explore the relation between exposure to job stressors and mental health. This is done with the primary intention of developing a new clinical approach, one which takes a proactive stance emphasizing the need for creating work conditions that are more in harmony with the needs of the human being. Pivotal to this endeavor is to provide an integrative and comprehensive methodology for assessing work stressors and ameliorating them whenever possible. This methodology, the Occupational Stressor Index (OSI), was developed by the authors who have successfully applied the OSI over the years in the context of prevention oriented clinical practice within neurology and psychiatry as well as within cardiology, oncology and other medical disciplines. The OSI is grounded in cognitive ergonomics and brain research. The authors, as clinicians, have a special interest in and affinity with their colleagues, their fellow physicians. Consequently, the working conditions and mental health of physicians are strongly emphasized throughout the book. Gender considerations are also woven into the entire book. This book will be of value to readers at many levels and interests. It is written in such a way that a non expert can learn a great deal about the topics. Readers at all levels can reflect on their own work situation and how it could be improved within the framework of enhanced mental health. For health professionals, particularly psychiatrists, occupational medicine specialists, clinical psychologists as well as physicians involved in primary care and rehabilitation, this book will represent a sorely needed paradigm shift which will help them address a main source of their patients' mental distress. It will be thought provoking and yet also practical. Part I of the book provides the multi faceted scientific justification for this new clinical approach. The authors, as clinicians themselves, speak the clinical language and guide the reader step by step as to how this approach can be applied in practice. **Federal Register**, 1972-12 **Screwed: the Path of a Healer** Amnon Goldstein, 2011-04-11 A masterful life story.
