John Bradshaw Cat Sense:

Cat Sense John Bradshaw, 2013-09-10 Cats have been popular household pets for thousands of years and their numbers only continue to rise Today there are three cats for every dog on the planet and yet cats remain more mysterious even to their most adoring owners Unlike dogs cats evolved as solitary hunters and while many have learned to live alongside humans and even feel affection for us they still don't quite get us the way dogs do and perhaps they never will But cats have rich emotional lives that we need to respect and understand if they are to thrive in our company In *Cat Sense* renowned anthrozoologist John Bradshaw takes us further into the mind of the domestic cat than ever before using cutting edge scientific research to dispel the myths and explain the true nature of our feline friends Tracing the cat's evolution from lone predator to domesticated companion Bradshaw shows that although cats and humans have been living together for at least eight thousand years cats remain independent predatory and wary of contact with their own kind qualities that often clash with our modern lifestyles Cats still have three out of four paws firmly planted in the wild and within only a few generations can easily revert back to the independent way of life that was the exclusive preserve of their predecessors some 10 000 years ago Cats are astonishingly flexible and given the right environment they can adapt to a life of domesticity with their owners but to continue do so they will increasingly need our help If we're to live in harmony with our cats Bradshaw explains we first need to understand their inherited quirks understanding their body language keeping their environments however small sufficiently interesting and becoming more proactive in managing both their natural hunting instincts and their relationships with other cats A must read for any cat lover *Cat Sense* offers humane penetrating insights about the domestic cat that challenge our most basic assumptions and promise to dramatically improve our pets lives and ours

Cat Sense John Bradshaw, 2013-08-15 From John Bradshaw one of the world's leading experts on animal behaviour and the author of the Sunday Times Bestseller *In Defence of Dogs* *Cat Sense* is a scientific portrait of the true surprising nature of cats Worshipped as gods feared as demonic servants seen as both wild opportunists and beloved companions cats often seem as unfathomable enigmatic and magical to us today as they did in ancient times They have lived with humans for at least ten thousand years far earlier than the reign of the Pharaohs and today are the most popular pet in the world That they now outnumber the dog man's best friend by three to one is small wonder at once affectionate and self-reliant they seem to be perfectly suited to our busy 21st Century lifestyles Yet cats still think like the wild scavengers and hunters from which they are descended and to which they can quickly revert Today they face unprecedented challenges in their life with humans from conservationists who cast them as a threat to wildlife from other cats who they compete for territory with and from good intentioned owners and vets with misconceptions of what they require Cats need not so much our sympathy but our understanding if they are to continue to enjoy our companionship The recent surge in feline science with John Bradshaw at the forefront means we are now better equipped to understand them than ever before *Cat Sense* offers us for the first time a true picture of one of
