Greenman, 1992-05-01 Foundations for Integrative Musculoskeletal Medicine Alon Marcus, 2005-01-20 This book an authoritative text on musculoskeletal and physical medicine that integrates Eastern and Western approaches covers every aspect of musculoskeletal medicine starting with an in depth introduction to Traditional Chinese Medicine TCM principles as they relate to the subject Author Alon Marcus surveys the science of pain from both modern biomedical and TCM perspectives examines the foundations of integrative musculoskeletal medicine explores biomedical and osteopathic clinical assessment and outlines treatment options such as acupuncture blood letting and meridian therapy Other chapters analyze herbal medicine integrative electrotherapeutics manual therapy and much more

Manipulative Therapy in Rehabilitation of the Locomotor System Karel Lewit, 1991 This book is the updated English version not a mere translation of a textbook which appeared successively in Czech in German in Bulgarian in Dutch and in Polish This English version is shorter more concise and includes the latest techniques The role of manipulation is limited to passive mobility and an important part of this book deals with active mobility The author emphasizes that this is a textbook and not a manual of techniques the latter deals with individual techniques while his purpose is to show that it can be disastrous to confine one s interest in this manner and to remain unaware of both the broader context of treatment and of the possible alternatives There are chapters on functional anatomy the diagnosis and treatment of disturbed locomotor system function including indications of appropriate treatment and the place of manipulation and finally a long chapter on the clinical aspects of impaired function of the locomotor system The book begins by discussing the major role played by impaired function in the vast majority of patients suffering from pain arising in the locomotor system This type of pain is altogether the most frequent from which patients suffer and the first two chapters of this book are mainly concerned with the origin of this pain It is traditionally associated with rheumatism but unfortunately rheumatologists are insufficiently aware of locomotor function and leave this field largely to neurologists and orthopaedic surgeons The author believes that the speciality which is principally concerned with impaired function and its restoration to normal is rehabilitation medicine a term which includes physical therapy and it is in this framework that the future of manipulation lies This will continue to be the case until one day a new speciality is established one which deals with the whole of the locomotor system and in particular with its function Ideally it should be called Musculo skeletal Medicine

The Merger Sibylle Reinsch, Michael Seffinger, Jerome Tobis, 2009-01-23 The Merger M D s and D O s in California If you are interested in the recent history of the

medical professions this book is for you If personal narratives of historical events speak to you as a second layer of documentation this book is for you If you are aware that in America there exist two separate yet equal fully licensed physicians M D s and D O s you might be interested in learning about their unique relationship in California If you know little about D O s this book will give you a picture of their approach to patient care and to their M D colleagues The osteopathic profession in California has a unique history as it differs dramatically from the professions history in the rest of the nation More than 100 years ago a small pioneering group of osteopathic physicians established in Southern California the Pacific School of Osteopathy to graduate physicians and surgeons with the ability to acquire an unlimited license Since then the educational research and regulatory arenas of osteopathy have seen in California low points of near elimination and high points of recognition Cultures are based on firm beliefs in the truth of their understanding of the world Often they collide with those who respect different truths Similarly the medical culture in California went through collisions between osteopathic and allopathic medicine often in response to competition and antagonism Which values and beliefs about each others profession were held so fervently in California that prompted the unique event of absorbing the osteopathic profession into allopathic mainstream medicine This project explores the events unique to California but with repercussions nation wide of a merger between osteopathic and allopathic medicine In 1962 the relatively small medical organization of fully licensed osteopathic physicians the California Osteopathic Organization merged with the much larger mainstream medical profession the California Medical Association What were the incentives for a fully licensed parallel healthcare profession to forfeit its identity and philosophy What key players and leaders emerged How did the individual practicing physician think and feel about the merger While about two thousand osteopathic physicians changed to the M D degree about two hundred California D O s did not merge but persevered in their battle to restore the licensing power of their profession in California What social and personal motivational sources sustained this group for over a decade How has osteopathys unique history affected medical education and professional relations nation wide and internationally Answers to these questions have emerged in historical narratives by key persons figuring in the events Most of them have not written about their lives and their social and political surroundings at the time of the merger and its repercussions Many never learned the long term outcomes of their endeavors Our multidisciplinary research team transcribed in depth interviews to capture the thoughts and feelings among individuals who played significant roles from the 1940s to the 70s With the approval of the Institutional Review Board of the University of California Irvine for the protection of the participants rights we asked a diverse group 35 in all of physicians administrators lawyers and lobbyists to provide their historical narratives and their suggestions for future directions Our objective has been to give an unbiased account listening equally to representatives of allopathy osteopathy and politics Inspired by Dr Gevitz cogent academic analysis of osteopathic medicine in America this book presents personal perceptions of events integrated with documented descriptions stored in archives to facilitate the readers understanding and analysis The
