Working with Text Emma Tonkin, Gregory J.L. Tourte, 2016-07-14 What is text mining and how can it be used? What relevance do these methods have to everyday work in information science and the digital humanities? How does one develop competences in text mining? Working with Text provides a series of cross-disciplinary perspectives on text mining and its applications. As text mining raises legal and ethical issues, the legal background of text mining and the responsibilities of the engineer are discussed in this book. Chapters provide an introduction to the use of the popular GATE text mining package with data drawn from social media; the use of text mining to support semantic search; the development of an authority system to support content tagging; and recent techniques in automatic language evaluation. Focused studies describe text mining on historical texts; automated indexing using constrained vocabularies; and the use of natural language processing to explore the climate science literature. Interviews are included that offer a glimpse into the real-life experience of working within commercial and academic text mining. Introduces text analysis and text mining tools. Provides a comprehensive overview of costs and benefits. Introduces the topic making it accessible to a general audience in a variety of fields including examples from biology, chemistry, sociology, and criminology.

[Failure to Disrupt](#) Justin Reich, 2020-09-15 A Science Reading List for Uncertain Times. Selection A: a must read for anyone with even a passing interest in the present and future of higher education. Tressie McMillan Cottom, author of Lower Ed, a must read for the education invested as well as the education interested. Forbes Proponents of massive online learning have promised that technology will radically accelerate learning and democratize education. Much publicized experiments, often underwritten by Silicon Valley entrepreneurs, have been launched at elite universities and elementary schools in the poorest neighborhoods. But a decade after the year of the MOOC, the promise of disruption seems premature. In Failure to Disrupt, Justin Reich takes us on a tour of MOOCs, autograders, intelligent tutors, and other edtech platforms, and delivers a sobering report card. Institutions and investors favor

programs that scale up quickly at the expense of true innovation Learning technologies even those that are free do little to combat the growing inequality in education Technology is a phenomenal tool in the right hands but no killer app will shortcut the hard road of institutional change I m not sure if Reich is as famous outside of learning science and online education circles as he is inside He should be Reading and talking about Failure to Disrupt should be a prerequisite for any big institutional learning technology initiatives coming out of COVID 19 Inside Higher Ed The desire to educate students well using online tools and platforms is more pressing than ever But as Justin Reich illustrates many recent technologies that were expected to radically change schooling have instead been used in ways that perpetuate existing systems and their attendant inequalities Science Pearl Harbor Attack United States.
