

How to use Manual Mode

a NO-BS guide to camera settings :)

less light, freezes action

Shutter Speed

is a fancy way of saying, how quickly the shutter opens & closes. The key thing to note here is that by using a slow shutter speed, you'll let in more light & the photo will be brighter... BUT you run the risk of having a blurry photo if you're not using a tripod.

more light, blurs action

1/1000 1/500 1/250 1/125 1/60 1/30 1/15 1/8 1/4 1/2 1 2 4 8 15 30

subject in focus, brighter

Aperture

is a fancy way of saying, controlling the size of your lens opening

Its also referred to as your f-stop. The key thing to note here is that by using a smaller f-stop (ie f/1.4), you'll let in MORE light & you'll get that "blurry background" effect. By using a larger f-stop (ie f/22), you'll let in less light & your ENTIRE image will be sharp & in focus (great for landscape photos).

everything in focus, darker

Choose a small f-stop if you want a "shallow depth of field" or "blurry background"

f/1.4 f/2.2 f/2.8 f/4 f/5.6 f/8 f/11 f/16 f/22

less grain, use in daylight

ISO

is a fancy way of saying, increase the brightness.

BUT the key thing to note here is that by increasing your ISO, you're also going to increase the amount of GRAIN or "digital noise" in your final image. So you want to keep your ISO as LOW as possible during daylight, then gradually increase as it gets dark out (aka night photography).

more grain, use at night

Choose a low ISO (ie ISO 100) during the day. Gradually increase as it gets dark out.

Learning Photography David Edwards, 2020-07-26 Did you buy a fancy new camera but your photos still aren't that great Are you shooting in auto mode because you don't know what all the buttons are for Then Learning Photography is the kind of guide you're looking for Assuming you have no knowledge about photography this guide's step by step format allows you to quickly learn the most important principles of photography as well as how to unlock your camera by shooting in manual mode Learn how ISO works why the aperture is so important when to adjust your shutter speed and understand how depth of field works Then combine everything together with the right type of lens and shoot Step out of your comfort zone by shooting RAW to get every bit of precious information from your photos so that you can have full control over them during post processing Learning Photography is an up to date guide that will enable you to unlock your full potential Walk away from crude badly composed selfies and impress everyone with your art

Dslr Manual Photography Explained! Aaron Chase, 2014-03-04 Why would I want to use the manual mode if my camera can automatically adjust these settings for me Well for the same reason that professional photographers use manual mode Control You see when you let your camera automatically choose its exposure settings based on the information its sensors are giving it your camera will strive to expose the image as close to what the human eye would perceive the scene However the problem with this is not only that it sometimes gets it wrong but also that the way the eye might see a scene is many if not most times not the most beautiful interesting way to capture that scene For example if you were taking a picture of the sun at sunset your camera might automatically want to expose the image rather darkly attempting to make both sun and landscape are properly exposed Your camera does not realize that a much more interesting picture could be created if you exposed the image so that the landscape became the star of your photograph exposing it so that it being the breathtaking landscape is well lit rich and interesting Or you could use your camera's automatic setting and end up with the landscape being a too dark uninteresting blob of dirt Another reason to use your DSLR's manual setting is that of style No matter whether photography is your hobby or you are looking to become a serious photographer you will eventually develop a style that you want your photography to look like Maybe that style is a dark and moody style or maybe it is a bright and cheerful style Regardless with manual you can control how your images feel and create a distinct and beautiful style in your images Whereas if you use the automatic setting this ability is taken away from you and you will end up looking like the hundreds of thousands of other digital camera users out there
