

An all-new collection of
science fiction stories by the
author of *The Wind From Nowhere*
and *The Drowned World*.

J. G. BALLARD

The book cover features a complex, abstract design. The top half is divided into two main color fields: a large red field on the left and a large green field on the right. The red field contains a faint, stylized illustration of a cityscape with a prominent tower. The green field contains a faint, stylized illustration of a landscape with a prominent tower. The bottom half of the cover is a light gray field with a faint, stylized illustration of a cityscape with a prominent tower. The title 'BILLENIUUM' is printed in large, bold, white capital letters across the middle of the cover, overlapping the red and green fields.

J.G. Ballard David Pringle, 1984 **J. G. Ballard, the First Twenty Years** J. G. Ballard, 1976 **Discourses and Narrations in the Biosciences** Brian Hurwitz, Paola Spinozzi, 2011

Discourses and Narrations in the Biosciences investigates the forms of writing in which scientific claims are formulated and announced Argumentative strategies compositional rules and figurative expressions in communication and narrativization of scientific knowledge are the focus of interdisciplinary contributions by humanities and science scholars The first part of the book dedicated to Rhetorical and Epistemological Aspects of Science Writing addresses how scientific pursuits and methods feed into multi level texts that generate responses within science society and culture The second part entitled Bioscientific Discourses and Narrations examines popularisations and fictionalizations of science in relation to diversity deviancy ageing illness reproduction the evolution of humankind mathematical models of biomedical systems and the myth of the heroic scientist Assessing the narrative impetus and command of literary and meta discursive strategies shown by contemporary science writers enhances understanding of the methods and conventions through which the biosciences produce knowledge *The Cambridge Companion to Utopian Literature* Gregory Claeys, 2010-08-05 Using a combination of historical and thematic approaches this volume engages with the fascinating and complex genre of utopian literature **Out of the Night and Into the Dream** Gregory Kent Stephenson, 1991-10-30 The author of *Empire of the Sun* and other acclaimed novels and stories British science fiction writer J G Ballard is here given a penetrating analysis his work being explored in terms of its internal coherence its continuity and development and its mythic and metaphysical aspects Ballard s fiction is widely considered to be a critique of our secular rational technological culture but this study departs from earlier ones that label him a fatalistic or nihilistic writer obsessed with entropy devolution and dissolution in showing him instead to be most deeply concerned with the redemption and regeneration of the human psyche With Ballard s focus so much on visionary perception and mystical transcendence Gregory Stephenson argues for his placement in the Romantic visionary tradition A comprehensive examination of Ballard s work this study traces his output and accomplishments over four decades exploring their thematic development Ballard is considered in relation to a number of British and American writers of the post World War II era within and beyond the often too rigidly applied categorization of science fiction as well as to poets and novelists of the past *The Routledge Companion to Science Fiction* Mark Bould, Andrew M. Butler, Adam Roberts, Sherryl Vint, 2009-03-30 The Routledge Companion to Science Fiction is a comprehensive overview of the history and study of science fiction It outlines major writers movements and texts in the genre established critical approaches and areas for future study Fifty six entries by a team of renowned international contributors are divided into four parts which look in turn at history an integrated chronological narrative of the genre s development theory detailed accounts of major theoretical approaches including feminism Marxism psychoanalysis cultural studies postcolonialism posthumanism and utopian studies issues and challenges

anticipates future directions for study in areas as diverse as science studies music design environmentalism ethics and alterity subgenres a prismatic view of the genre tracing themes and developments within specific subgenres Bringing into dialogue the many perspectives on the genre The Routledge Companion to Science Fiction is essential reading for anyone interested in the history and the future of science fiction and the way it is taught and studied **A Companion to Science Fiction** David Seed, 2008-06-09 A Companion to Science Fiction assembles essays by an international range of scholars which discuss the contexts themes and methods used by science fiction writers This Companion conveys the scale and variety of science fiction Shows how science fiction has been used as a means of debating cultural issues Essays by an international range of scholars discuss the contexts themes and methods used by science fiction writers Addresses general topics such as the history and origins of the genre its engagement with science and gender and national variations of science fiction around the English speaking world Maps out connections between science fiction television the cinema virtual reality technology and other aspects of the culture Includes a section focusing on major figures such as H G Wells Arthur C Clarke and Ursula Le Guin Offers close readings of particular novels from Mary Shelley's Frankenstein to Margaret Atwood's The Handmaid's Tale

Creating Short Fiction Damon Knight, 1997-03-15 Distilled from decades of teaching and practice Creating Short Fiction offers no nonsense advice on structure pacing dialogue getting ideas and much more **Index to Science Fiction Anthologies and Collections** William Contento, 1978 **Mindscapes, the Geographies of Imagined Worlds** George Edgar Slusser, 1989 Eighteen essays plus four examples from the ninth annual J Lloyd Eaton Conference on Science Fiction and Fantasy Literature at the University of California Riverside The concept of mindspace Slusser and Rabkin explain allows critics to focus on a single fundamental problem The constant need for a relation between mind and some being external to mind The essayists are Poul Anderson Wendy Doniger O Flaherty Ronald J Heckelman David Brin Frank McConnell George E Slusser James Romm Jack G Voller Peter Fitting Michael R Collings Pascal J Thomas Reinhart Lutz Joseph D Miller Gary Westfahl Bill Lee Max P Belin William Lomax and Donald M Hassler The book concludes with four authors discussing examples of mindspace The participants are Jean Pierre Barricelli Gregory Benford Gary Kern and David N Samuelson

Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1964 Includes Part 1 Number 1 Books and Pamphlets Including Serials and Contributions to Periodicals January June **The Ecological Transition** John W. Bennett, 2017-09-29 Written during the height of the ecology movement The Ecological Transition is a stunning interdisciplinary work It combines anthropology ecology and sociology to formulate an understanding of cultural environmental relationships While anthropologists have been studying relationships between humans and the physical environment for a very long time only in the last thirty years have questions inherent in these relationships broadened beyond description and classification For example the concept of environment has been extended beyond the physical into the social Although anthropologists have adopted many of the concepts that Bennett develops in the book he also feels that

the central issues have never been addressed either by anthropologists or by people in related disciplines The most important of these in Bennett's opinion is the failure to incorporate a respect for the environmental in contemporary culture which would allow making exceptions in certain human practices in order to protect the environment His point in *The Ecological Transition* is that a basic cultural change in modern civilization is necessary to achieve this end Both a theoretical and a practical work *The Ecological Transition* emphasizes the relationships between human culture the physical environment technology and social policy *The Ecological Transition* is a challenging volume that makes us face the consequences of human behavior in the modern world its effect on pollution natural resources agriculture the economy and population to name just a few areas The book remains a significant contribution to the discourse on social economic and environmental problems While the book was first published in 1976 it still reads as a contemporary tract

Short Story Index, 1974

Obsolescence Daniel M. Abramson, 2016-02-12 In our architectural pursuits we often seem to be in search of something newer grander or more efficient and this phenomenon is not novel In the spring of 1910 hundreds of workers labored day

and night to demolish the Gillender Building in New York once the loftiest office tower in the world in order to make way for a taller skyscraper The New York Times puzzled over those who would sacrifice the thirteen year old structure as ruthlessly as though it were some ancient shack In New York alone the Gillender joined the original Grand Central Terminal the Plaza Hotel the Western Union Building and the Tower Building on the list of just one generation s razed metropolitan monuments In the innovative and wide ranging *Obsolescence* Daniel M Abramson investigates this notion of architectural expendability and the logic by which buildings lose their value and utility The idea that the new necessarily outperforms and makes superfluous the old Abramson argues helps people come to terms with modernity and capitalism s fast paced change *Obsolescence* then gives an unsettling experience purpose and meaning Belief in obsolescence as Abramson shows also profoundly affects architectural design In the 1960s many architects worldwide accepted the inevitability of obsolescence experimenting with flexible modular designs from open plan schools offices labs and museums to vast megastructural frames and indeterminate building complexes Some architects went so far as to embrace obsolescence s liberating promise to cast aside convention and habit envisioning expendable short life buildings that embodied human choice and freedom Others we learn were horrified by the implications of this ephemerality and waste and their resistance eventually set the stage for our turn to sustainability the conservation rather than disposal of resources Abramson s fascinating tour of our idea of obsolescence culminates in an assessment of recent manifestations of sustainability from adaptive reuse and historic preservation to postmodernism and green design which all struggle to comprehend and manage the changes that challenge us on all sides
