briefly discussing the cognitive operations involved in processing this hybrid medium then by surveying the generic branches of comics and then by offering an historic examination of its contemporary development which goes back as far as the sixteenth century Next is an analysis of comics in relation to literature film and the visual arts Comics utilizes elements from all of these but it also offers a unique narrative experience This book primarily focuses upon Ware's magnum opus to date Jimmy Corrigan It contextualizes his work within developments in comics over the last fifty years as well as comparing him to other prominent figures such as Will Eisner Art Spiegelman Daniel Clowes Alan Moore Neil Gaiman Lynda Barry and Frank Miller

**The Visible Text** Thomas A. Bredehoft, 2014-01-16 Oxford Textual Perspectives is a new series of informative and provocative studies focused upon literary texts conceived of in the broadest sense of that term and the technologies cultures and communities that produce inform and receive them It provides fresh interpretations of fundamental works and of the vital and challenging issues emerging in English literary studies By engaging with the materiality of the literary text its production and reception history and frequently testing and exploring the boundaries of the notion of text itself the volumes in the series question familiar frameworks and provide innovative interpretations of both canonical and less well known works Covering materials ranging from Anglo Saxon manuscripts and inscribed objects to contemporary comics The Visible Text rewrites the history of textual media and technologies Arguing that media are not defined by technologies alone but by a combination of technologies and the ideas that people hold about those technologies Bredehoft identifies four distinct periods or domains in the history of English literature that correspond to four ways in which media ideologies interacted with the two basic defining technologies of manuscripts and printed books Examining two complementary ways of defining texts as subject to a reproductive medium on the one hand and as surrounded and defined by paratexts on the other The Visible Text points out how Anglo Saxon manuscripts and contemporary comics share a remarkable similarity in being structured as productions rather than reproductions Contrastingly the late medieval and print era periods share a cultural investment in textual reproduction but they differ both in their characteristic technologies and in how they conceptualize the object of reproduction itself A final epilogue briefly considering the nature of electronically mediated textuality highlights the importance of understanding the history addressed here as electronic text both parallels

and departs from typographic print in ways that earlier reproductive domains clarify and complicate Filled with concrete examples of both books and texts *The Visible Text* will be of interest to readers in the fields of literature book history literary theory media studies and visual culture
